County of El Dorado Planning and Building Dept.
2850 Fairlane Court
Placerville, California 95667

To whom it may concern:

I am writing in response to the Conditional Use Permit S18-0010/Lake Forest park. The proposal does not indicate what type of radio transmissions will emit from the site. I have no objection to the installation of the site, but would like to know what kind of radio signal will emit from this site. My concern is 5G signal. Mobile telephone started in the VHF frequency range (30-300 Mhz) and has the need for more bandwidth and speed requirement, it was moved to the UHF range (300-3000 Mhz). Now for 5G network, the radio range will be in the SHF range (3000-30,000 Mhz). There is more and more evidence showing that 5G radiation signal can be harmful to humans. Reports from San Francisco, Los Angeles and Houston shows that humans, living close to the towers, are showing signs of health problems. I think the county should make sure of the type of signal to be installed from the site. It may affect folks living around the site and possibly put the county in financial risk.

Yours truly,

Jean Lavaud

CBS News Admits, 5G Is Already Causing Staggering Health Problems: 'A Health Calamity Unlike Anything America Has Ever Seen Before Is Waiting And Could Happen Fast'

- 'Microwave Bath' Sure To Cause Cancer Nationwide Can Be Nothing Less Than Intentional

By Stefan Stanford - All News Pipeline - Live Free Or Die ()

In this new story over at Forbidden Knowledge TV (<https://forbiddenknowledgetv.net/first-5g-rollout-in-ca-causing-brain-damage-to-firefighters/>) that Steve Quayle linked to on his website (<http://www.stevequayle.com/>) Wednesday morning they reported that the roll out of 5G is already causing staggering health problems after firefighters in several different California counties from San Francisco to Sacramento to Los Angeles reported neurological damage, headaches, insomnia, memory problems and confusion soon after 5G equipment was installed outside of their fire stations.

And while one wouldn't blame the reader for thinking that story might be some bizarre 'conspiracy theory', back on May 29th of this year, CBS Sacramento reported (<https://sacramento.cbslocal.com/2018/05/29/questions-raised-about-5g-health-risks-months-before-sacramento-launches-service/>) that major health risk questions have been raised about the roll out of 5G just months before Sacramento officially launches 5G services and their story indeed reports:

Firefighters in San Francisco have reported memory problems and confusion after the 5G equipment was installed outside of fire stations. The firefighters claim the symptoms stopped when they relocated to stations without equipment nearby.

As the Forbidden Knowledge TV story also reported, when the firefighters were tested, they were found to have brain abnormalities and measurable neurological deficits and as this January story over at CBS San Francisco reported (<https://sanfrancisco.cbslocal.com/2018/01/25/consumerwatch-5g-cellphone-towers-signal-renewed-concerns-over-impacts-on-health/>), California firefighters have now been exempted from the installment of 5G equipment near their fire stations.

Yet as the CBS San Francisco story also pointed out, 5G equipment is also being installed around homes, churches, schools, hospitals, stores, office parks and all across the country (Verizon_Commercial_5G_Death_Zones.php). Are firefighters somehow specifically vulnerable to the negative health effects of 5G in a way that, for some strange reason, the rest of us aren't?

Of course that last statement was facetious and knowing that firefighters in California will be exempted from having 5G equipment installed upon their fire houses due to proven negative health effects should be looked at as a red-alert warning call to us all. If firefighters don't want this equipment near their stations (https://www.lightconspiracies.com/if-firefighters-are-concerned-about-exposure-to-cell-towers-and-antennas-maybe-everybody-should-be-5g-complaints-by-san-francisco-firefighters-are-unsettling/), why would we want it near our homes? While supporters and 'pushers' of 5G claim that it is safe, the International Association of Firefighters disagrees. From the CBS San Francisco story (https://sanfrancisco.cbslocal.com/2018/01/25/consumerwatch-5g-cellphone-towers-signal-renewed-concerns-over-impacts-on-health/):

The International Association of Firefighters began opposing cell towers on fire stations, after firefighters complained of health problems.

"These firefighters developed symptoms," says Dr. Gunnar Heuser who conducted a pilot study on firefighters at a station with cell towers.

"The symptoms included problems with memory, problems with intermittent confusion, problems with weakness," Heuser said.

Heuser says their brain scans suggest even low-level RF can cause cell damage and he worries about more vulnerable groups like kids.

"We found abnormal brain function in all of the firefighters we examined," Heuser said.

**Firefighters, Paramedics & Parents
Against Cell Towers in Our Neighborhoods**

Home The Facts The Solution Research Contact Us

Attention

The Los Angeles County Board of Supervisors and our Fire Chief have handed over your tax dollars to government contractors who are installing dangerous, high power cell towers at your neighborhood fire station - close to your homes, schools, and parks!

These 50-70 high cell towers - like the one in the picture in the right column - will emit radio-frequency radiation that will expose firefighters, paramedics, and your family to significant health risks every day.

This is the most urgent sign the pledge below to keep our communities safer.

CLICK HERE TO JOIN US BY SIGNING THE PETITION

"As firefighters and paramedics, we live in these firehouses. What effect will these towers have on us? What are the risks to our neighborhood? It's a no-brainer that LA County should at least have done a proper study before putting 200-foot high power microwave antennas on top of our heads."

- Dave Gillette, Active Duty Fire Captain, President, LA County Firefighters Local 1914

With an organization as credible as the International Association of Firefighters opposing the roll out of 5G (https://zero5g.com/2017/firefighters-ban-cell-towers-fire-stations-2004/) near their fire stations for very obvious reasons, why is it still being rolled out in very close proximity to peoples homes, our children's schools, and places such as near doctors offices all across America?

As we reported within this April 5th ANP story (5G_AI_Transhumanism_A_Look_At_The_Future.php), while the mainstream media as a whole has been noticeably silent about the dangers of 5G, local outlets such as the previously mentioned CBS outlets in California have been publishing a number of stories about the dangers warned of by experts and 'normal citizens' alike.

The following excerpt came to us from an April story over at WTOP in Washington DC (https://wtop.com/montgomery-county/2018/04/montgomery-co-residents-5g-wireless-cell-antennas-pose-health-risks/slide/1/) in which we learn a number of residents of the DC suburb of Montgomery County are fighting a change to the zoning laws that would allow 5G wireless system antennas to be placed upon utility poles and buildings, often within a stones throw of houses and schools. From WTOP:

"Our quiet suburban neighborhood is being targeted for 16 cell towers to be installed within 20 feet of our homes," said Donna Baron, a resident of North Potomac during a county council public hearing Tuesday night. "North Potomac is being targeted for a total of 61 cell towers."

"These 5G towers would emit radio frequency radiation into our yards, our homes and our bodies, 24 hours a day, 365 days a year," said Baron, urging the county council to reject zoning law changes that would permit the cell antennas.

Other residents expressed alarm and concern over the health risks they said could ensue from cell antennas placed as near as 20 feet from homes. "We are very concerned about the placement of wireless antennas in places where people play, sleep and work," said Theodora Scarato, executive director of Environmental Health Trust. "There are hundreds of

scientists who have concluded that this is a risk."

As Zero5G reports (<https://zero5g.com/>), there is NO 'safe level' of 5G or wireless radiation for people, animals, or nature and even though we are unable to actually 'see' microwaves or electromagnetism, radio-frequency (RF) waves & electromagnetic microwave radiation (EMR), they remain a significant source of harmful and even deadly 'pollution'.

And while some might call it a stretch to call the invisible radiation that will be permeating the planet with the proliferation of 5G 'invisible killing fields', as we reported on ANP all the way back in July of 2017 (Cell_Phones_Attention_Spans_Dumbed_Down_America.php), the website 'Electric Sense' published a story titled "11 Reasons To Be Concerned About 5G Dangers" (<https://www.electricsense.com/12399/5g-radiation-dangers/>) within which they listed numerous health hazards we'll face from the roll out of this new technology across America.:

Thousands of studies link low-level wireless radio frequency radiation exposures to a long list of adverse biological effects, including:

*DNA single and double strand breaks
oxidative damage
disruption of cell metabolism
increased blood brain barrier permeability
melatonin reduction
disruption to brain glucose metabolism
generation of stress proteins*

And as we reported on ANP back on June 3rd (5G_Crowd_Control_Govt_Preps.php), 5G technology is 'silent weapon technology', capable of being used in military crowd control weaponry, and it's being placed in neighborhood's across America. Dane Wigington from Geoengineering Watch had a very, very interesting theory (<https://www.geoengineeringwatch.org/geoengineering-watch-global-alert-news-june-2-2018-147/>) about its roll out.:

Our government continues to do anything they want to the climate, and the planet as a whole. The push to saturate the biosphere with highly destructive 5G transmissions is the most recent alarming example. 5G frequencies are also used for crowd control. Is the power structure preparing for what they certainly know is inevitable? Unfolding global chaos?

So once again, why is 5G tech being fast-tracked into neighborhoods and near schools and other locations of mass gatherings all across America when we have proof of the negative health effects of 5G (<https://www.aircrap.org/2018/07/24/sacramento-1st-5g-rollout-in-ca-causing-brain-damage-to-firefighters/>), and that not from some tinfoil hat conspiracy theorists but the International Association of Firefighters?

And firefighters aren't the only ones speaking out. A group of well over 100 scientists studying in the fields of biological and health effects from non-ionizing EMF fields have signed an international appeal (<https://emfscientist.org/index.php/emf-scientist-appeal>) for 5G to be studied more closely before it is rolled out all across the planet, warning of the potential dangers. From their appeal:

We are scientists engaged in the study of biological and health effects of non-ionizing electromagnetic fields (EMF). Based upon peer-reviewed, published research, we have serious concerns regarding the ubiquitous and increasing exposure to EMF generated by electric and wireless devices. These include—but are not limited to—radiofrequency radiation (RFR) emitting devices, such as cellular and cordless phones and their base stations, Wi-Fi, broadcast antennas, smart meters, and baby monitors as well as electric devices and infra-structures used in the delivery of electricity that generate extremely-low frequency electromagnetic field (ELF EMF).

Numerous recent scientific publications have shown that EMF affects living organisms at levels well below most international and national guidelines. Effects include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans. Damage goes well beyond the human race, as there is growing evidence of harmful effects to both plant and animal life.

These findings justify our appeal to the United Nations (UN) and, all member States in the world, to encourage the World Health Organization (WHO) to exert strong leadership in fostering the development of more protective EMF guidelines, encouraging precautionary measures, and educating the public about health risks, particularly risk to children and fetal

dereliction. By not taking action, the WHO is failing to fulfill its role as the preeminent international public health agency.

And while 5G will continue to be rolled out across America due to the billions and billions of dollars that it will bring in according to former FCC Commissioner Tom Wheeler as heard in the final video below, a video titled "*The Scariest 3 1/2 Minutes Ever!*", as we also hear from Wheeler, 5G is far too important to the globalists agenda to waste too much time testing it properly to make sure it is safe.

And we'll close by republishing two excellent and eye-opening comments from this CBS Sacramento story (<https://sacramento.cbslocal.com/2018/05/29/questions-raised-about-5g-health-risks-months-before-sacramento-launches-service/>) within which they warned of some of the potential future health problems that will come along with the roll out of 5G.:

*Dave Lynch May 30, 2018 at 4:31 pm The **5G system is population extermination and profiteering disguised as communications**. I am not surprised considering the lousy leadership in California. With so many smart people in the world, surely a better method is available, but **a microwave bath certain to cause cancer can be nothing more than intentional**. I urge all Californians to ban the 5G system. All your cancer awareness programs and fund raisers are an utter waste of time with these towers in operation. Think about that one for a minute,*

*Kelley Eidem July 16, 2018 at 7:31 pm What happened to the firefighters when they were exposed to 5G early is the sort of thing I've been warning about on my Facebook Timeline (Kelley Eidem) for several months now. To see a news article about it, brings it home. By the way, the immediate threats are the ions that the towers generate. Frequencies can be just fine if the ions are neutralized. The ions can be neutralized by adding ceramic to each mast. **Otherwise there will be a calamity unlike what this country has ever seen and it will happen fast**.*
