Cooperator Agreement No. _____

**MASTER
STEWARDSHIP AGREEMENT
Between The
County of El Dorado
And the
USDA FOREST SERVICE, ELDORADO NATIONAL FOREST**

This Master Stewardship Agreement is hereby made and entered into by and between the County of El Dorado, hereinafter referred to as "County of El Dorado," and the USDA Forest Service, Eldorado National Forest, hereinafter referred to as the "Forest Service," under the authority and provisions of the Agricultural Act of 2014, Pub. L. 113-79, sec. 8205.

Background: In 2003 Congress authorized the Forest Service and the Bureau of Land Management to enter into stewardship contracts and agreements "to achieve land management goals for the national forests that meet local and rural community needs." The primary focus of this legislation is to achieve land management goals through stewardship projects awarded under contracts or agreements. Unique to the legislation is the ability to exchange goods for services that meet the land management objectives.

The area addressed in this Master Stewardship Agreement is known as the Eldorado National Forest, capturing all of the Eldorado National Forest within El Dorado County. It includes all of the Placerville Ranger District and portions of the Georgetown and Pacific Ranger Districts. This area includes an un-estimated number of acres to be treated during the term of this Master Stewardship Agreement.

The Eldorado National Forest is located within 3 - 4 hours driving time from the San Francisco Bay Area, a metropolitan complex of 4.5 million people. Sacramento is located within 1 - 1 1/2 hours driving time from the forest with a population of over 1,000,000 people. The forest ranges in elevation from 1,000 feet in the foothills to more than 10,000 feet above sea level along the Sierra crest. The mountainous topography is broken by the steep canyons of the Mokelumne, Cosumnes, American, and Rubicon rivers. Plateaus of generally moderate relief are located between these steep canyons.

A complicated land ownership pattern exists within the boundary of the Eldorado National Forest. About 786,994 acres of El Dorado County reside within the U.S. Forest Service boundary, however 190,270 acres are privately owned and the other 596,724 acres are National Forest System land. This land pattern dates back to early railroad grants and appears as a checkerboard on maps. The parcels of Other Ownership (private or other Agency land) are mostly isolated and surrounded on all sides by government land. An opposite pattern occurs outside of the Forest Boundary where several small scattered pieces of National Forest lands are

separated from the main body and surrounded by lands of Other Ownership.

The principle vegetative types found on the Forest are woodland, chaparral, mixed conifer, true fir, and subalpine. A wide variety of hardwoods, brush, grasses, and forbs are mixed in with each of these forest types.

Water is a major resource of the Eldorado National Forest. The average acre on the Forest receives about 56 inches of precipitation annually. Average annual runoff is about 29 inches. This is roughly equal to a yield of 2.4 acre-feet of water per acre of land per year; therefore National Forest lands yield an estimated 1,444,000 acre-feet annually. Significant watersheds for the El Dorado Irrigation District and Sacramento Municipal Utility District, are found within the boundary of the forest.

The Eldorado National Forest has a high density transportation system containing 2,367 miles of roads and 349 miles of trails. Roads under Forest Service jurisdiction combine for a total of 2,158 miles. There are 209 miles of county roads and another 400 miles of private roads within the Forest boundary.

I. PURPOSE:

The purpose of this Master Stewardship Agreement is to document the cooperative effort between the parties for landscape restoration activities within the Eldorado National Forest in accordance with the following provisions and the hereby incorporated Template for Stewardship Supplemental Project Agreement (SPA), attached as Exhibit A.

II. STATEMENT OF MUTUAL BENEFIT AND INTERESTS:

The Forest Service is a land management agency dedicated to the wise use and management of National Forest System (NFS) lands, including the responsibility for maintaining and improving resource conditions.

The mission of the Forest Service is this: to sustain the health, diversity, and productivity of the nation's forests and grasslands for present and future generations. As an integral part of this mission, the Pacific Southwest Region's leadership intent and annual prioritization is to retain and restore ecological resilience of NFS lands to achieve sustainable ecosystems that provide a broad range of services to humans and other organisms. Ecologically healthy and resilient landscapes, rich in biodiversity, will have greater capacity to adapt and thrive in the face of natural disturbances and large scale threats to sustainability, especially under changing and uncertain future environmental conditions such as those driven by climate change and increasing human use.

The stewardship projects developed under this Master Stewardship Agreement are in furtherance of the County of El Dorado's mission and interest in land management and restoration, and for the purpose of protecting, enhancing, and restoring forest and watershed health and bringing economic opportunities to the local area including, but not limited to: fire hazard mitigation by

removing and thinning trees for hazardous fuel treatments and timber stand improvements; vegetation management to enhance wildlife habitat conditions through biomass removal, hand piling, and burning; removal and utilization of timber and forest byproducts; providing opportunities for using prescribed fire to improve forest health; meadow, stream, and riparian area restoration and protection; water quality enhancement; noxious weed control; road maintenance, reconstruction, hazard tree removal, and/or road removal; and improvement of recreational opportunities (e.g. trails and campgrounds).

This Master Stewardship Agreement will provide an opportunity for the parties to seek funding to expand partnership opportunities, and to garner new and additional support from partners, including but not limited to the timber industry, Federal and non-Federal entities, tribal entities, and the County of El Dorado's members and volunteers. Mission accomplishment for both parties will be furthered by the restoration of natural resources across the landscape.

All projects conceived under this Master Stewardship Agreement will undergo a collaborative process to determine specific habitat improvements. The collaborative process will ensure that the benefits of undertaking restoration activities are mutually beneficial to the County of El Dorado and the Forest Service as well as being beneficial to a wide diversity of interests involved in collaboration.

Both parties share an interest in improving the ecosystem condition and function of the landscape. A healthy landscape provides a variety of benefits beyond the needs of a single species, and therefore benefits both parties.

It is therefore mutually beneficial for the parties to work together to implement landscape restoration and enhancement projects.

In consideration of the above premises, the parties agree as follows:
