This 2021 Master Plan update is the first 5-year check-in since the 2016 Master Plan was adopted. The update process began in September 2020, with a suite of engagement opportunities that invited community members to participate in the process at their convenience and in a manner most comfortable to them. Since the Master Plan process occurred during State social distancing orders related to the COVID-19 Pandemic, the planning process used digital forms of input.

**Focus groups:** Three focus groups engaged 32 participants who represented various interest groups such as the local sports leagues, the senior center and senior community, other agencies, trail users, disc golfers, mountain bikers, and the school districts. Focus groups were conducted online using the Zoom platform, including a digital whiteboard to record participant feedback.

**Stakeholder interviews:** MIG's project manager conducted eight one-on-one interviews with the members of the Board of Directors and community leaders to get their perspectives on community needs and priorities.

**Interactive online map-based survey:** The maptionnaire survey platform was used during the 2016 Master Plan process and captured an excellent response. To reach out to the broad El Dorado Hills community, a survey was implemented to validate whether 2016 goals, directions, and priorities were still on track and to identify new and emerging needs. The survey ran from October 16 to December 8, 2020, publicized by the District through a variety of channels. A total of 2,209 people responded.

In the last decade, El Dorado Hills has seen 8% population growth, higher than is seen in many communities around the region. Growth is expected to continue, with the District's population growing to nearly 63,000 residents in 2036, based on Sacramento Area Council of Governments (SACOG) growth projections. This is a 34% increase from the current population of 46,593. The sheer number of additional residents underscores the need to ensure the District's parks and facilities adequately serve more people and sustain the expected level of service and experience

the community appreciates. In addition to more people moving to El Dorado Hills, the age profile is shifting.

(see excerpts below)

The District's Board of Directors established a guiding strategic framework for the District as a service provider, which includes a vision, mission, core values, goals, and strategies. This framework was affirmed by the District's 2014 Strategic Planning efforts. It was modified in 2015-16 based on the Board's emphasis on sustainability, trends, and the community's interest to include an additional goal related to sustainability. More recently, it was updated based on community input from the 2021 Master Plan process.

The 2021 Plan Update process found that the vision and goals are still aligned with community needs and interests. Community input guided refinements to the goals, which included splitting up facility development/maintenance and programming into two separate goals and further focusing on communication and collaboration with residents and stakeholders.

The public engagement effort for the Master Plan evaluated whether the vision and goals were still reflective of residents' preferred direction for El Dorado Hills as outlined in 2016 and responsive enough to accommodate emerging trends and issues. The engagement process reconfirmed that trails and open space are defining characteristics of the District and highly valued by the community. The 2016 review of relevant best practices, existing conditions, and the regulatory landscape are carried forward. Staff have embraced the recommendations in later chapters and have used them as a guide for investment and funding opportunities, making sure that staff reports prepared for the Board of Directors identify the recommendations that support the action. Collectively, this validates the Master Plan vision and continues to reflect the desired future for the El Dorado Hills park and recreation system; that the goals remain relevant to the community.

- A.6 Apply the design guidelines contained in Appendix F when developing new parks, reviewing private park proposals, and reinvesting in existing parks.
- Neighborhood parks should at minimum have a playground designed for all abilities, picnic shelter, and an internal pathway system with pedestrian amenities such as benches and pedestrian scaled lighting.
  - Village parks should have all the amenities of a neighborhood park plus at least two additional compatible recreation facilities (see the design guidelines). i.e., restrooms, sports courts, and multi-purpose sport fields.
  - Community parks should include sports fields and other facilities designed to serve a community-wide audience.
  - Consider renewable energy in park design such as solar generated and central-controlled irrigation systems to reduce future operating costs.
  - Provide El Dorado County with the adopted design guidelines for development projects within the District's SOI to ensure cohesive
  - designs in new subdivisions.

C.1 Protect open space to maintain the character of El Dorado Hills.

- Retain the goal of providing 40.5 acres of protected open space per 1,000 residents, including District-owned, other agency-owned, and HOA-owned lands.
- Each proposed eligible development, as defined in El Dorado County's General Plan Policy 2.2.3.1, must preserve 30% of acreage as open space.
- Locate private/HOA preserved open spaces in locations that contribute to contiguous trails, outdoor recreation opportunities, and habitat wherever possible.
- Pursue a standard of 3.0 acres per 1,000 residents of District-owned and managed open space.

Within the District's Nexus Study, David Taussig & Associates (DTA) includes an AB 1600 Nexus Test on page 10, Table 3, as depicted below:

**TABLE 3**  
**EL DORADO HILLS COMMUNITY SERVICES DISTRICT**

Public Park and Recreational Facilities AB 1600 Nexus Test	
Identify Purpose of Fee	Park and Recreational Facilities.
Identify Use of Fee	The design, acquisition, installation, and construction of public park and recreational facilities.
Demonstrate how there is a reasonable relationship between the need for the public facility, the use of the fee, and the type of development project on which the fee is imposed	New development will generate additional residents who will increase the demand for active and passive park and recreational facilities within the District. Land will have to be purchased and improved to meet this increased demand, thus a reasonable relationship exists between the need for park and open space facilities and the impact of development. Fees collected from new development will be used exclusively for park, recreational, and open space facilities identified here in Section IV.

Identified on page 13, Table 7, of the District's Nexus Study, are Cost Assumptions for New Park Development and related administration.

**Park Impact Fee:** The District provides parks and recreation services to nearly 45,000 residents. As new population enters the community, the existing park and recreation infrastructure is further impacted. To ensure that the level of service for current residents is not detrimentally impacted, the County and District have agreed upon a development Park Impact Fee. The fee effecting the reported FY2024 is:

	<u>Starting 06/09/23</u>
Single Family Residential Unit	\$13,496
Multifamily Residential Unit	8,907
Age Restricted Unit	7,886
Mobile Home Park Unit	Exempt
Accessory Dwelling Units	Exempt
Single Family Unit-Serrano	7,215
Multifamily Unit-Serrano	4,761
Age Restricted Unit-Serrano	4,186
