Hi Suzanne,

Could you attach this to item #58 (09-1397)

I would like the Board to consider moving 2 meetings a month to evening in order for the working public to attend issues concerning land use projects and General Plan Amendments. These items are of most concern to the general public. Here is a suggested schedule:

1st week - Day time county business meeting

2nd week - Night time development projects and County Construction projects meeting

3rd week - Day time county business meeting

4th week - Night time development projects, General Plan Amendments, Issues and reinterpretation meeting

If there are not 4 meetings in a month, at least one meeting should be in the evening. The working public feel as if this is intentional in keeping them out of the process when it come to development.

Respectfully,

Sue Taylor
