Subject: **Placerville Airport, Placerville, El Dorado County, California –
Install New AWOS III on Existing Tower - Construction**
Application for Federal Assistance - Independent Fee Estimate

Dear Mr. Ambrose:

The consulting firm of Brandley Engineering was selected from those consultants who submitted their qualifications, and the County of El Dorado entered into an agreement with Brandley Engineering.

The County of El Dorado proposes to install a new AWOS III on the existing tower at Placerville Airport. Brandley Engineering presented a proposal for providing engineering services during construction for this project, which includes engineering during construction and final project closeout and resident engineering and inspection.

The County currently has a contract with Brandley Engineering for the construction management of the 2025 Install New Beacon Tower and Beacon project at Georgetown Airport, which has a similar scope of work and complexity to the Placerville Airport New AWOS III on Existing Tower project as they are both fairly simple electrical projects with similar construction durations. The primary differences in scope are that the Georgetown Airport project included preparation of the DBE Program and Goal Preparation for FY25-27, 20 working days for construction, an allowance for structural engineering subconsultant costs to review the beacon pole submittal structural calculations and certified concrete testing lab costs for testing the concrete for the new beacon tower foundation. The Placerville Airport New AWOS III on Existing Tower project doesn't include and DBE Program and Goal preparation costs, has 15 working days for construction, and structural engineering subconsultant review of submittals and certified concrete testing is not required since this project installs new equipment on the existing AWOS tower.

In order to normalize the 2025 Georgetown Airport Install New Beacon Tower and Beacon project construction management cost of \$121,000 to more closely match the scope of the Placerville

Airport New AWOS III on Existing Tower project, I made the following modifications to the Georgetown Beacon project construction management costs:

- Subtract \$13,200 from the 2025 Georgetown Airport New Beacon cost for the DBE Program and Goal Preparation
- Subtract \$6,600 from the 2025 Georgetown Airport New Beacon cost for structural engineering subconsultant
- Subtract \$5,500 from the 2025 Georgetown Airport New Beacon costs for the certified concrete testing lab
- Multiplied the resulting 2025 Georgetown Airport New Beacon costs by 15/20 to account for the difference in working days.

The resulting normalized 2025 Georgetown Airport Install New Beacon Tower and Beacon costs is \$78,250.

The consultant's fee proposal for the construction management of the Placerville Airport New AWOS III on Existing Tower project of \$73,000 submitted on 12/18/25 is within 7.2% of the normalized 2025 Georgetown Airport Install New Beacon Tower and Beacon costs and is considered reasonable. This fee includes direct labor work hours, labor rates, general and administrative overhead, non-salary expenses, and a reasonable profit.

Should you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

EL DORADO COUNTY
