

ATTACHMENT D
Revisions to the El Dorado County Parks and Trails Master Plan
Generated by Public Comments during MND Review Period

Page	Revision
52	<p>Just one mile north of Silver Lake, EID also operates the Oyster Creek Rest Area.</p> <p>Reference to Oyster Creek Rest Area has been removed because it has been closed and restored to its natural state.</p>
81	<p>The 10-acre EID parcel at Forebay Reservoir has 3-5 acres that are <u>A portion of the EID property along the eastern boundary of Forebay Reservoir is currently unimproved, and which could be developed</u> Participants were interested in exploring the potential for additional passive recreation use such as trails, play structures, and picnic areas to complement the existing recreation activities allowed at Forebay Reservoir. <u>EID is currently planning and designing the El Dorado Forebay Remediation Project that will result in an enlargement of the facilities to meet dam safety requirements and increase the emergency water supply. The project is scheduled for construction in 2013 or 2014. The potential for expanding the passive recreation uses around the reservoir would need to be compatible with the remediation project.</u></p>
82	<p>People routinely walk the EID canal ditch alignment in Pollock Pines. Is this a designated trail or if not, could it be? <u>The alignment crosses approximately 50 private parcels, and is not a designated public facility. As with all EID facilities, potential use for public recreation depends on various factors including whether or not EID has the authority to grant public access, and operational and safety considerations. If access could be secured, a possible route would be from the EID pump house at the Reservoir 1 water treatment plant, along the ditch , and around Forebay Reservoir to the managed recreation area, and the proposed improved picnic area. Any trails would also need to be compatible with the El Dorado Forebay Reservoir Remediation Project.</u></p>
83	<p>The Bray Reservoir, an EID facility might be a good location for some trails and passive uses depending on safety and site conditions. <u>At this time, EID continues to maintain the Bray Reservoir as a potential future water treatment or storage facility location, with no plans to allow public access for passive recreation purposes.</u></p>
104	<p>CP1.B. Identify opportunities to collaborate with EID to add improvements to the Forebay Reservoir property to complement County park facilities. <u>The feasibility of any improvements depends on various factors including whether or not EID has the authority to grant public access, and operational and safety considerations. Improvements would also need to be compatible with the El Dorado Forebay Reservoir Remediation Project.</u></p>
119	<p>A third potential route would provide access to EID's Forebay recreation facilities, potentially utilizing <u>pending the ability to secure easements along the canals. Development of this route would also be contingent on compatibility with EID's plan to pipe sections of the Main Ditch downstream of Forebay Reservoir.</u></p>
106-107	<p>The County received a grant of \$133,000 in 2003 to refurbish two ball fields for Girls' Softball use located on Fairgrounds property near Ray Lawyer Drive. This grant must be utilized by 2014. A second grant for \$1.73 million was requested in 2010 to</p>

Page	Revision
	reconstruct and configure the historic Dub Walker American Legion regulation size baseball field in the Fairgrounds and create parking to serve all three fields. Field configuration as proposed would also allow for regulation league and junior soccer fields to be laid out in the fields. The second grant was not successful, but concept plans and the CEQA Initial Study have been completed. <u>Because</u> t The ball fields are currently being used for staging race activities at the Fairgrounds, which have increased significantly since the original grants were submitted, <u>the 2003 grant has been returned to the State.</u> In the future, if the use of the space for racing activities is no longer a priority, if the conflicting demands for the space can be resolved, these ball fields should be completed and made available on a reservation basis similar to the fields at Pioneer Park and Henningsen Lotus Park to help meet the significant demand from local sports leagues for baseball fields, especially in the populous areas surrounding Placerville.
Multiple	Bradford Park acreage was revised from 5 to 3 (rounded from 2.6). All references and related calculations updated throughout document including Table 12 and Table 14 and associated text.
45	A store at Chili Bar has been open at various times in the past to sell supplies and snacks, but <u>has not been open since the land was acquired by the County.</u> is not operated on a regular basis.
58	Trails on other BLM holdings on the South Fork of the American River include the Red Shack Trail, which connects State Route 49 to the river below Chili Bar, and a <u>rough</u> trail within the 233-acre Wildman Hill acquisition on the north side of river canyon. The <u>This</u> trail descends steeply <u>towards</u> the river from the trailhead on Highway 193 but does not provide direct river access.
155	Footnote added to Table 26 – Reservations and Fees ³ <u>Commercial whitewater rafting permit fees are not included in these amounts as they are directed to the River Trust Fund expressly for implementing the River Management Plan.</u>
126	AD10. Parks and Trails Master Plan Update <u>The Parks and Trails Master Plan should be reviewed on a periodic basis at the discretion of the Parks and Recreation Commission and updated as needed to reflect changes in recreation trends, project priorities, and user priorities.</u>
152, Table 25	<u>AD10. Parks and Trails Master Plan Update</u>
27	Policy 1.1.1 Areas with relatively high population density and no or minimal <u>that have public park acreage below the recommended General Plan amount</u> should be priority locations for new neighborhood and community park development.
134	Appropriate road crossings should be part of the route.
135	Land that is to be dedicated for a neighborhood park should generally be within ½ mile <u>walking or biking distance</u> of the population it will serve.
140	d. Frequent, convenient access/egress points <u>with appropriate road crossings as needed</u> should be located along trails in neighborhoods and communities to facilitate use and trail security.

Page	Revision
142	b. Trail crossings of busy streets <u>or rails</u> should be minimized. Where crossings are needed, a location with adequate sight distance shall be selected and appropriate signage <u>and crossing treatments</u> installed.
142	c. Trail intersections with other trails should be located and designed so that sight distance, grades, and other features enhance crossing safety.
143	m. Regional connectors should ideally provide accessible facilities for pedestrian, bicycle, and equestrian users. However, ownership and terrain may preclude the ability to secure a sufficiently wide easement for all uses. In such cases, uses will be selected based on community priorities and feasibility.
143	b. For all other trails, tread width minimum requirements: <ul style="list-style-type: none"> • Single-use trails : 4 feet • Dual- or multiple- use trails : 8<u>10</u> feet c. To accommodate the minimum tread widths specified in 'b', trail easements for single-use trails shall be a minimum width of 8 feet. Easements for dual or multiple trails should be a minimum of 12 <u>14</u> feet in width.
Appendix B	Add Duffy Park (2 acres) for City of Placerville
Appendix C	Darrington Trail is <u>not</u> open to equestrians. El Dorado Trail (Los Tramos Dr. to Placerville) is not open to equestrians.
116	TR1.C. Implementation of the eastern most segment of the El Dorado Trail from Pacific House to the City of South Lake Tahoe should continue to be pursued. While much of the trail already exists via various unpaved trails through the Eldorado National Forest, significant technical analysis is needed to identify the specific alignment, design, and acquisition details. <u>There is also a missing link where the original route between the historic Hawley Grade and the Pacific Crest Trail at Echo Summit lies under the Highway 50 roadbed.</u> The terrain may also limit the range of potential trail <u>alignments and</u> uses in certain areas.
