

PETITION

277
2910

To: The Honorable Board of Supervisors of the County of El Dorado

We, the undersigned residents of the County of El Dorado served by the Pioneer Fire Protection District, hereby request that the El Dorado County Board of Supervisors continue the Funding for Fire Protection and Emergency Medical Services to our District at it's current level of funding.

This funding is CRITICAL in order for our fire district to continue to provide the level of service that it currently does. The Pioneer Fire Protection District serves an estimated population of 8,000 and covers 296 square miles (187,000 acres). The District responded to 667 calls for service in 2008. This call-for-service volume has increased consistently from 515 in 2007 and 504 in 2006. All these calls have been handled (and residents and transient population served) by ONE 24/7 staffed engine company (full-time paid personnel) and a part-time engine company staffed with resident firefighters. The District is run very efficiently and fiscally responsibly by Chief Robert Gill and two administrative staff.

If Pioneer Fire Protection District's share of the "parity" fire protection funding (\$279,000) is eliminated, or even reduced, the effects on the District and it's residents would be significant and devastating. The loss of Pioneer FPD's share would be the loss of almost ONE THIRD of it's operating budget and would effect EVERYTHING within the District:

- **This money is used for day-to-day operation of the Fire District.**
- **Response times within the District would increase.**
- **There would be reductions in FIREFIGHTING PERSONNEL.**
- **With a smaller department and longer response times, the ISO insurance rating for the district would potentially be effected, therefore increasing insurance costs for the District's residents.**

Thank you for your consideration.

Respectfully,

PETITION

To: The Honorable Board of Supervisors of the County of El Dorado

We, the undersigned residents of the County of El Dorado served by the Pioneer Fire Protection District, hereby request that the El Dorado County Board of Supervisors continue the Funding for Fire Protection and Emergency Medical Services to our District at it's current level of funding.

This funding is CRITICAL in order for our fire district to continue to provide the level of service that it currently does. The Pioneer Fire Protection District serves an estimated population of 8,000 and covers 296 square miles (187,000 acres). The District responded to 667 calls for service in 2008. This call-for-service volume has increased consistently from 515 in 2007 and 504 in 2006. All these calls have been handled (and residents and transient population served) by ONE 24/7 staffed engine company (full-time paid personnel) and a part-time engine company staffed with resident firefighters. The District is run very efficiently and fiscally responsibly by Chief Robert Gill and two administrative staff.

If Pioneer Fire Protection District's share of the "parity" fire protection funding (\$279,000) is eliminated, or even reduced, the effects on the District and it's residents would be significant and devastating. The loss of Pioneer FPD's share would be the loss of almost ONE THIRD of its operating budget and would affect EVERYTHING within the District:

- This money is used for day-to-day operation of the Fire District.
- Response times within the District would increase.
- There would be reductions in FIREFIGHTING PERSONNEL.
- With a smaller department and longer response times, the ISO insurance rating for the district would potentially be effected, therefore increasing insurance costs for the District's residents.

Thank you for your consideration.

Respectfully,
