Placerville, CA 95619

Dear Doug,

Last year we increased your Usage Fee for CT by 2.15% to cover the cost of living increase as applicable to the Bay Area. That increase went exclusively to salary increases for our staff.

I wanted to let you know that for the financial year beginning 2008 we will be increasing our maintenance fees again by 2.15%, the average index for the last 5 years. This amount was determined using the Consumer Price Index for the Bay Area.

I also want you to know that this adjustment in our Usage fee will again be used entirely for cost of living adjustments to the salaries of the staff at CompuTrust.

We sincerely believe that with CompuTrust you will get the best value for your money both from product functionality and from a service point of view.

We have brought out this year our new CompuTrust Internet version with many significant enhancements including a Imaging Module and Barcoding that can be used with Asset Management, Double Entry Accounting, Task Management to name a few. We would be happy to arrange to visit you to demo this version.

As you know, your Usage Fee entitles you to upgrades of CompuTrust free of charge. As with the Visual Basic version, there would be no charge for the software upgrade however there may be chargeable expenses for installation, conversion, customization and training at our current per diem rate.

Yours sincerely

Rolf Kessel
President
