

TEA28 Changes

Invoicing Changes

PES forms are no longer required for any category. There will be an expanded inspection work plan spreadsheet which will include reporting on both CalRecycle-assigned and unassigned inspections. Inspection hours will still be reported on the Expenditure Itemization Summary form. Staff training details will be reported in an expanded performance report form.

Form 229

The 229 will no longer be required. The information previously collected on the 229 will now be collected on an expanded Performance report form.

Budget Category Change

The Equipment category has been removed and replaced with a new category called, "Operational Costs". Operational Costs is where you may now budget for equipment, direct charges for space, etc. This does not represent a programmatic change in how you bill expenses to the grant, it is just a naming change so the category accurately encompasses charges we commonly saw under "Equipment".

Training on Changes

CalRecycle will hold a webinar before the start of TEA28 to go over the changes and new performance report in more detail.
