This letter is to voice our concern to the proposed "Sundance" subdivision in Pilot Hill.

The Divide Horsemen's Association is a club of 200 local members who regularly ride, maintain, and advocate for our local trails. Our club advocates for the north/south trail easement through the Sundance subdivision which would provide access from Salmon Falls Road through Sundance to Rattlesnake Bar. Olmstead Loop/Knickerbocker is now accessible from Rattlesnake Bar through Pilot Hill Estates to the existing trailhead.

The developer and his attorney have argued that a trail through the Sundance property is a trail to "nowhere". That simply is not true. This trail piece would be a logical and essential 'connector' from the Salmon Falls area trails to existing trails and be a complement to the goal of a master trail linking the entire Divide communities to each other, and providing trail users a path from Folsom to the Divide, and on to Tahoe.

Also, to preserve the future of the area's trails system, it is important that easements for trails be secured as development occurs. To mitigate the deletion of a trail through this development by providing Quimby fees to the Georgetown Divide Recreation District that can be used anywhere on the Divide does not provide a connecting trail through the Sundance parcel.

Please be especially mindful of community need and trail recreation as you consider the Sundance development and how it might fit into our existing community. The Divide area has a long established history of rural horse trails and horseback riding recreation--please decide with this in mind. Divide Horsemen's Association is committed to making sure that rural trails, which are part of the El Dorado County Master Plan, are included in proposed developments such as Sundance.

Respectfully,
John Larson DHA Vice-President
