 FROM: Jose' M. Crummett, GIS Manager
 SUBJECT: Population Study Update for 2010

Supervisor Sweeney,

Per your request, I have updated the 2010 population estimates for Supervisorial Districts. The previous numbers, provided in 2008, were estimates based on census 2000 data and parcel files from 2001, 2004, and 2008. Data for 2010 were projected based on those annual estimates and projected growth rates. This report contains updated 2010 data. These numbers are estimates derived using the same methodology as that used for 2004 and 2008, that is with a current 2010 parcel base and the census 2000 data.

The updated estimates show the total county population for 2010 to be 183, 858 where as the report done in 2008 projected a population total of 186,146. At the supervisorial district level the data do show that the District III population, of 33536, continues to account for a smaller and smaller share of the total population, in 2001 it accounted for 19.57% of the county's population, this report estimates it to be just 18.24%. Also District II continues to account for a larger percentage of the population, nearly 22%. Its estimated total of 40214 is almost twenty percent larger than District III.

Of course I'm available for any questions or concerns.

District	2001		2004		2008		2010	
	population	% Total	population	% Total	population	% Total	population	% Total
I	30541	19.54%	34053	20.04%	37186	20.57%	37624	20.46%
II	30559	19.55%	34652	20.39%	38662	21.39%	40214	21.87%
III	30587	19.57%	32227	18.97%	33610	18.60%	33536	18.24%
IV	30570	19.56%	33065	19.46%	34860	19.29%	35420	19.26%
V	34042	21.78%	35908	21.13%	36425	20.15%	37064	20.16%
Total	156299		169905		180743		183858
