1969 Thiokol Sprite Restoration

This estimate is for restoration of a 1969 Thiolol Sprite snow cat. The work that will be done is very extensive. Time allotment for this project is 6 months, mainly for getting parts and materials to complete this project. We have enclosed a list of the work that will be performed on the snowcat. Some of the items that need to be installed as discussed will be provided by EDSO, radios, code 3 lights, and Flir camera, and anything else they would like to have installed, that is essential for the duties. We shall provide everything else that is not LE proprietary. Elite Control Inc is anticipating the cost to be estimated at \$50,000.00, providing no major issues are found or additions that are not on the list **already**. We will try to get as much as we can donated or at reduced costs. We will bill out every 2 weeks on progression of custom build. Pictures of the build progress will be taken along with all parts and material that will be put into a binder on final completion. Any member of the EDSO team is welcome to stop by and check progress. If you approve of everything listed and sign contract the first **initial** payment of \$12,000.00 is due, this is only to order the new motor asap since it can take up to 8-12 weeks to get.
