BUDGET TRANSFER JUSTIFICATION AND DESCRIPTION* (will be scanned into FENIX TCM)

Agriculture Department is requesting a budget transfer increasing appropriations in Professional Services by \$400,000 offset by state revenue for Glassy Winged Sharpshooter delimitation. Between October 1, 2024 and October 15, 2024, the California Department of Food and Agriculture (CDFA) confirmed the presence of the Glassy-Winged Sharpshooter (GWSS), the invasive vector of the bacterium that causes Pierce's disease in grapes, in the area of El Dorado Hills, El Dorado County. Based on these detections and recommendations from CDFA GWSS staff entomologists, CDFA concludes that an infestation of GWSS exists in the area. This pest presents a significant, clear, and imminent threat to the natural environment, agriculture, economy, and private and public property. Unless emergency action is taken during these GWSS's life cycles, there is high potential for sudden future detections in El Dorado County.
