El Dorado County has had 42,782 tests done. Nancy Williams has not answered the question as to what amplification cycles are being used during that test process. I find this incredibly disturbing. These tests are being used to quarantine people and shut down our society. Shouldn't we be sure of their accuracy? We have had over a 1000 new cases in the month of November and not a single increase in fatalities, with that remaining at just 4. This either shows us that the virus is not as dangerous as was first explained or there are some serious concerns over the PCR tests being used.

Failure by the county to do it's due diligence surrounding these tests and by continuing to fund these tests with public funds creates grounds on Misuse of Funds and Liability for the negative impacts suffered by businesses resulting from restrictions imposed due to our increase in case counts..

In 2018 El Dorado County had 33 deaths from the Flu. There was no shutdown or response by the government, what has changed? The current help to people and businesses suffering from these shutdowns such as Sales Tax deferred payments and Mortgage Forbearance programs seem predatory in nature. These payments are becoming due in the form of balloon payments as soon as the forbearance/deferred period is over. This Covid19 response seems to be less about health and more about attacking the middle class by destroying small businesses and killing jobs.

With mortality numbers remaining low the new fear tactics have been on hospital capacity and their ability to care for people. We need to also look at this with skepticism. Is the hospital incentivized by Cares dollars? Is there an increase in capacity over previous years? If the staffing is low, is it because they have scaled back staff because of the low demand on other services like surgeries? Are the cases of Covid in the hospitals from people that arrived because they were experiencing Covid symptoms or because they were there with other health problems but then tested positive? As the policy is to test all people at the hospitals.

I understand there is a lot of fear surrounding Covid and that you all are in a very tough position as some people want to remain locked down. I hope you look at the larger picture and see the great news of survivability that we are experiencing in this county and that outlook gives you the bravery to adopt The Healthy Communities Resolution and take back local control of the Covid19 response. That decision has the power to save our businesses, livelihood and community. We desperately need that kind of leadership at this time. Thank you.

Keeley Link, resident of Placerville

Supervisors,
End the lies and madness over 4 COVID deaths in 10 months!
Vote yes now!
Open this county NOW!

Very Sincerely,

Michael C Mueller, RCDD, DCCA,DSCE

To All Parties,

I'd like to bring your attention to the results of the petition that was hosted online during the last couple of days. During which, El Dorado County residents and businesses owners of various parts participated and left comments for the County Officials. 475 people have signed and 139 commented.

The attached Pdf file contains the description of the petition along with list of names and comments that can be viewed and printed.

I urge you to take into consideration requests and comments from your constituents.
P.S. please reply to the email above to notify that this email was received.

In collaboration with residents and businesses of El Dorado County
Sasha Iudina- Concerned businesses owner and resident of EDC

Reopen El Dorado County

About this petition

As residents of El Dorado County we are extremely concerned for the future of our community. Due to the restrictions and closures related to Covid our small businesses are facing great hardship along with residents who are not able to engage in activities like sports, worship and in-person education that are essential to our physical and mental wellness. If the restrictions continue on we will face greater impact of more permanent business closures, job losses, deaths of despair, drug abuse, depression among youth, delayed medical care, domestic violence, child abuse and much more. We need to have local flexibility based on what's occurring in our community. Current restrictions impact small businesses and schools without any showing that those environments have anything to do with the cases observed in our county.

Local oversight for our rural community is imperative to the survival of local businesses and quality of life.

The Healthy Communities Resolution proposes:

1. That our community is best served by an ability to respond locally to the virus in accordance with local data.
2. That our county is geographically diverse and not suited for county-wide restrictions.
3. That school districts are urged to safely open and provide in-person education to the greatest extent without delay.

Therefore we the undersigned are concerned citizens who urge our Board of supervisors and Public health officer to act now and adopt the Healthy Communities Resolution, and submit the executed resolution to the Governor and the State legislative representatives.

Comments: Way past overdue, stop ignoring the blatant law breaking of our bill of rights. Specifically the 1st & 14th amendments. We as citizens have a right to assemble, and all businesses must be treated equally under the law. Either have a 2 week shutdown announced in advance of every single business (including all essentially deemed corporations) and everyone must stay at home. Or open our county up and end this "Emergency" that has lasted 9 months and will be a year plus if no action is taken!

Comments: Understanding that keeping people safe means more than keeping residents of Eldorado County from supposed exposure to Covid-19 by using ineffective business and school lockdowns. It is your job to consider all aspects of what being safe means, physically, mentally and fiscally. The supposed cure can not be worse than the poison.

Comments: Re opening gives back the opportunity for our commerce, jobs and economic growth.. here's the thing about this.. it seems to me that if we follow the suggestions to wear a mask and gloves and social distancing in a store or a street or restaurant then they can stay in business.. personal choice is key here whether you believe a mask et al works is not the point.. if it's a good thing great.. if not what is the difference.. I wear one.. well maybe I forget sometimes but hey I do my best Since people are so upset right now I see doing this will make people comfortable. Our local business is suffering its worse than the disease as our community is suffering but keep in mind our country community and Coworkers and Churches are shutting down. Far be it from me to say.. but that is very far from an answer.. if you want to not wear masks or wash your hands.. well I'm just gonna say it.. I don't like it either but it is easy to do..and it comforts others too. I agree that being controlled like this is wrong.. I will support this petition.. but the fact is that the door is open.. all that we can do is support our local community.. sometimes you just wear a mask.. I don't like it either but I do it

Comments:

us that the virus is not as dangerous as was first explained or there are some serious concerns over the PCR tests being used.

Failure by the county to do it's due diligence surrounding these tests and by continuing to fund these tests with public funds creates grounds on Misuse of Funds and Liability for the negative impacts suffered by businesses resulting from restrictions imposed due to our increase in case counts..

In 2018 El Dorado County had 33 deaths from the Flu. There was no shutdown or response by the government, what has changed? The current help to people and businesses suffering from these shutdowns such as Sales Tax deferred payments and Mortgage Forbearance programs seem predatory in nature. These payments are becoming due in the form of balloon payments as soon as the forbearance/deferred period is over. This Covid19 response seems to be less about health and more about attacking the middle class by destroying small businesses and killing jobs.

With mortality numbers remaining low the new fear tactics have been on hospital capacity and their ability to care for people. We need to also look at this with skepticism. Is the hospital incentivized by Cares dollars? Is there an increase in capacity over previous years? If the staffing is low, is it because they have scaled back staff because of the low demand on other services like surgeries? Are the cases of Covid in the hospitals from people that arrived because they were experiencing Covid symptoms or because they were there with other health problems but then tested positive? As the policy is to test all people at the hospitals.

I understand there is a lot of fear surrounding Covid and that you all are in a very tough position as some people want to remain locked down. I hope you look at the larger picture and see the great news of survivability that we are experiencing in this county and that outlook gives you the bravery to adopt The Healthy Communities Resolution and take back local control of the Covid19 response. That decision has the power to save our businesses, livelihood and community. We desperately need that kind of leadership at this time. Thank you.

Keeley Link, resident of Placerville

Please add this email to Public Comment on Agenda Item 17 as well as the Covid19 update of today's BOS Meeting.
