WHEREAS, Consultant has been engaged by County to provide Research and Data Collection/Analytics for the Stepping Up Initiative, in accordance with Agreement for Services #3977, dated May 16, 2019; and Amendment I, dated January 30, 2020; incorporated herein and made by reference a part hereof; and

WHEREAS, the parties hereto have mutually agreed to extend the expiration date of the term of the Agreement, hereby amending **ARTICLE II – Term**; and

WHEREAS, the parties hereto have mutually agreed to revise the Compensation for Service of the Agreement, hereby amending **ARTICLE III – Compensation for Services**; and

NOW THEREFORE, the parties do hereby agree that Agreement for Services #3977 shall be amended a second time as follows:

ARTICLE I

Scope of Services:

- A. The following services will be performed under the Justice and Mental Health Program (JMHCP) grant:
1. Consultation and meetings with staff from Probation, Jail, Behavioral Health, Courts, and other County staff as needed to manage grant implementation.
 2. Develop enhanced logic models that link system and client outcomes. These metrics would include the basic Stepping Up Metrics as well as approaches that get at quality/speed/efficiency/cost of serving the mentally ill in the justice system.
 3. Create process maps to inform areas for system improvement, client connections, and efficiency gains from multiple stakeholder perspectives. The maps allow for the system that services to then be augmented with data and workload to better understand the operational implications, then move to prioritize areas of improvement or process re-engineering, as well as programmatic intervention.
 4. Develop data dictionaries for reporting and analyzing trends, outcomes, and self-service analytics from jail booking data files, Probation, and Behavioral Health services. Create a basic set of dashboards and views to facilitate County level ongoing management, as well as automation and scaling of data workflows to be implemented by county IT.
 5. Develop a public data strategy to help stakeholders and providers in Stepping Up share de-identified information through strategies and best practices of open data.
 6. Conduct quantitative and qualitative analysis based on data prioritized in Step 3. The deliverable will be a PowerPoint presentation and, depending on scope, a memo of key findings covering current engagement and outcomes for those with mental illness.
 7. Develop two new program designs or grant applications from the analysis and operational work plans that will serve as training for staff in how to leverage administrative data for developing programs using data from the project. These can be for sub-populations, geographies, responses to legislation, or grant opportunities.
 8. Meeting Facilitation
 - a. Conduct meetings as needed to coordinate the Program Assessment, Action Plan, and the Planning and Implementation Guide.
 - b. Participate in El Dorado County JMHCP technical assistance meetings as needed.
 - c. Assist El Dorado Stepping Up (EDSU) with JMHCP performance measurement reporting as needed.
 9. Complete the JMHCP Planning and Implementation Guide in collaboration with EDSU by June 30, 2021.
- B. The following services will be performed under Community Corrections Planning/Implementation Funding:
1. Data management, analysis, and strategies.
 - a. Review community corrections data collected, discuss and assist with analysis.
 - b. Make recommendations and assist with current and future community corrections data strategies.
 - c. On-call support for data fidelity, including analysis, review, and troubleshooting.
 2. At the direction of the County, assist with the design of a program evaluation process that will report on overall Community Corrections outcomes and individualized Community Corrections programming components.

3. Provide database recommendations and database technical assistance specific to community corrections data and the infrastructure of data collection and data sharing countywide and department specific.
4. Incorporate findings related to current data management and analysis practices, and proposed outcome evaluations into a report on suggested future collection and analysis efforts, as requested.
