Roger,

Below are some suggestions to LDM based on our meeting last week.

1. Remove the Exception found under 2.4.2.1.B.9 to secondary fire apparatus roads. This will lead to confusion since no exceptions are allowed under the Fire Safe Reg's.
2. I noticed the Planning Services website no longer has a link to the County Fire Safe Regulation PDF below. This is the document that has the State Reg's along with the pertinent County Ordinances. **Would you be able to get this back on the Planning Services section of the County Website?**

After the LDM is approved, the document will need to be updated since many of the references are to the DISM. I'm happy to help with that, just let me know how you think it would be best to proceed.

Thank You,

Chris Anthony
