Dear Board of Supervisors,

I am writing to express my deep concern about the future of oak woodlands in El Dorado County. The hearings on this topic have not been convenient for residents to attend and so I hope you consider this letter.

I have lived in El Dorado county for twenty-five years so I have seen the tremendous growth and the numerous ways that our county has been impacted. It seems that developers have already gotten away with cutting down oak trees.

I urge you to support policies that protect the oaks, whether it is in developed areas or remote areas.

Thank you for the opportunity to express my feelings about the future of our oak woodlands.

Sincerely,

Jan Okamura
