**Whereas**, advanced prostate cancer commonly spreads to the bones, which can cause pain in the hips, spine, ribs, or other areas in the body, and

**Whereas**, the 5-year survival rate approaches 100% when prostate cancer is diagnosed and treated early, but drops to 29% when it spreads to the other parts of the body and treatment options for prostate cancer vary depending on a man's age, stage and grade of his cancer, as well as his other existing medical conditions; and
