Putting the Navigation Center on Perks Court is putting your community and the homeless at risk. It is not feasible for a project of this magnitude. It is absurd to use emergency funds for a temporary facility that will only hinder the benefit of the homeless in the long run and compromises the quality of life for the current residents that live there and our community as a whole. There are vacant buildings and land in the county that can house a homeless intake program. To continue to push the "tent" proposal on your constituents that have repeatedly asked you to consider other options is going against your duty to serve our community. You were elected to make decisions that are based on accurate information and a favorable outcome for the community. The BOS has failed to consider the input of the community against this project and still to this day, have not reached out to the homeowners who live on Perks Court.

The cost, location and ultimate fail of this project will only put a strain on future help for the homeless. Where are they going to go in two years when this "temporary" facility is removed and have no where to go? Use the funds to acquire and put a permanent facility in a location that is not in a residential area, that is not on top of a high traffic/congested roadway, that should be near resources for the homeless to utilize and not an eye sore for our incoming tourists.

I am against this center going in on Perks Court.

Respectfully,

Kim Preston

Please send this to all of the supervisors. Thank you.

Homelessness in our area must be addressed! After reviewing the pros and cons of the Perk Court project, I think it's our best chance to act on the homeless problem.

There is no place in the city or county that will suit everyone. This is a well thought out plan and funding has been secured. Many of the objections have been proven to be based on incorrect information.

Please act now and approve the Perk's Court project while we have the grants to fund it.

Thank you.
