

### RESOLUTION 072-2022

### OF THE BOARD OF SUPERVISORS OF THE COUNTY OF EL DORADO

# Adopting the El Dorado County General Plan Traffic Impact Fee (TIF) Program 2022 Annual TIF Schedule

WHEREAS, the County Board of Supervisors has long recognized the need for new development to help fund the roadway, bridge, and transit improvements necessary to serve that new development; and

WHEREAS, starting in 1984 and continuing until the present time, the Board of Supervisors has adopted and updated various fee resolutions to ensure that new development on the western slope pay its fair share of the costs of improving the County and state roadways necessary to serve that new development; and

WHEREAS, General Plan Measure TC-B requires the County to adopt a traffic impact fee program and to update the program annually for changes in project costs; and

WHEREAS, in accordance with those General Plan requirements and implementation measure, Ordinance No. 5045 (El Dorado County Code Chapter 12.28) provided that said fees shall be adjusted annually by an increase or decrease in actual project costs (accomplished by updating cost estimates using actual construction costs of ongoing and completed projects and the most current cost estimates for those projects that are far enough along in the project development cycle to have project cost estimates) or pursuant to the Engineering News-Record Building Cost Index, as appropriate; and

**WHEREAS,** with the adoption of Board Resolution 196-2020, the Board adopted the now named Traffic Impact Fee (TIF) Program in lieu of the Traffic Impact Mitigation (TIM) Fee Program; and

**WHEREAS**, project costs have been updated as required by Ordinance No. 5144, resulting in revisions to the TIF schedule as shown on Exhibit A hereto; and

WHEREAS, the Board of Supervisors held a duly noticed public hearing during which updates to the fee schedule were studied and reviewed and the Board of Supervisors thereafter made the following findings in support of the updates to the fee schedule:

#### Government Code Section 66001(a)(1): Identify the purpose of the fee.

The purpose of the TIF is to fund capital transportation/circulation improvements which are related directly to the incremental traffic/vehicle burden imposed upon the County's transportation/circulation system by new development in the unincorporated west slope of El Dorado County through 2040. The TIF and TIF program are an implementation measure, as required by Implementation Measure TC-B of the 2004 General Plan adopted by the County Board of Supervisors: "2004 El Dorado County General Plan: A Plan for Managed Growth and Open Road; A Plan for Quality Neighborhoods and Traffic Relief." The TIF program addresses the need to fund a road system capable of achieving the traffic level of service standards of the County's General Plan. Transportation improvements funded by the TIF include future improvements as well as improvements already installed which are subject to reimbursement agreements. Improvements included in the TIF program are necessary to accommodate new development; such improvements include, but are not limited to, new local roads, local road upgrades and widenings, signalization and intersection improvements, operational and safety improvements, Highway 50 improvements, and bridge replacement and rehabilitation. The TIF advances a legitimate County interest by enabling the County to provide infrastructure to new development and to require new development to pay its fair share.

Government Code Section 66001(a)(2): Identify the use to which the fee is to be put. If the use is financing public facilities, the facilities shall be identified. That identification may, but need not, be made by reference to a capital improvement plan as specified in Section 65403 or 66002, may be made in applicable general or specific plan requirements, or may be made in other public documents that identify the public facilities for which the fee is charged.

The fee is to be used to fund transportation/circulation improvements necessary to accommodate new development in the unincorporated west slope of El Dorado County through 2040 as contemplated by the General Plan, including future improvements as well as improvements already installed which are subject to reimbursement agreements. The TIF will fund new local roads, local road upgrades and widenings, signalization and intersection improvements, operational and safety improvements, Highway 50 improvements, bridge replacement and rehabilitation, transit improvements in accordance with the El Dorado County Transit Authority's Capital Improvement Program (CIP), and costs associated with ongoing program, staff, and consultant costs for annual updates, major updates, and ongoing administration related to the TIF Program. The County's CIP, which is updated and adopted annually, identifies every project to be funded by the TIF and includes the following information for each project: detailed cash pro-formas which show all revenues by funding source and all expenditures per fiscal year; a current year work program; a future work program broken down into five year, ten year, and twenty year timeframes; and additional details for each capital project, including project description, a financing plan, and tentative schedule.

## Government Code Section 66001(a)(3): Determine how there is a reasonable relationship between the fee's use and the type of development project on which the fee is imposed.

There is a reasonable relationship between the fee's use and the type of development project on which the fee is imposed as set forth in the following documents, all of which are incorporated into this resolution as if fully set forth herein:

- The El Dorado County Traffic Impact Fee (TIF) Program Update Nexus & Funding Model (Nexus Study) prepared by Urban Economic, DKS Associates and Kimley-Horn, December 8, 2020. The cost estimates for projects underway in the Nexus Study were updated by County staff for the 2022 TIF Program Annual Update, dated May 17, 2022, and the updated project costs are attached as Exhibit C.
- The most currently adopted El Dorado County Capital Improvement Program.
- The 2016 Programmatic Environmental Impact Report for the Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County, certified on December 6, 2016.
- The Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County Addendum to the Environmental Impact Report, March 2018.

There is a reasonable relationship between the TIF's use and the type of development projects on which the fee is imposed because the transportation/circulation facilities funded by the TIF are needed to accommodate and mitigate the incremental new traffic/vehicle burdens generated by the development of new commercial, industrial, and residential uses upon which the fee is imposed. (See documents cited above.) There is a reasonable relationship between the need for the transportation/circulation facilities and the development of new commercial, industrial, and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged.

## Government Code Section 66001(a)(4): Determine how there is a reasonable relationship between the need for the public facility and the type of development project on which the fee is imposed.

There is reasonable relationship between the need for the public facility and the type of development project on which the fee is imposed as set forth in the following documents, all of which are incorporated into this resolution as if fully set forth herein:

• The El Dorado County Traffic Impact Fee (TIF) Program Update Nexus & Funding Model (Nexus Study) prepared by Urban Economics, DKS Associates and Kimley-Horn, December 8, 2020. The cost

estimates for projects underway in the Nexus Study were updated by County staff for the 2022 TIF Program Annual Update, dated May 17, 2022, and the updated project costs are attached as Exhibit C.

- The most currently adopted El Dorado County Capital Improvement Program.
- The 2016 Programmatic Environmental Impact Report for the Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County, certified on December 6, 2016.
- The Western Slope Roadway Capital Improvement Program and Traffic Impact Mitigation Fee Program for El Dorado County Addendum to the Environmental Impact Report, March 2018.

There is a reasonable relationship between the need for the public facility and the type of development projects on which the fee is imposed because the transportation/circulation facilities funded by the TIF are needed to accommodate and mitigate the incremental new traffic/vehicle burdens generated by the development including those from new commercial, industrial, and residential uses upon which the fee is imposed. (See documents cited above.) There is a reasonable relationship between the need for the transportation/circulation facilities and the development of projects including new commercial, industrial, and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged.

The previously adopted Nexus Study provides a thorough analysis of the required transportation facilities to be improved as a result of development and provides information of the fair share analysis and fees required by TIF Zone that is further broken down by development type. The TIF Program Schedule Resolution, which may be amended from time to time, provides the most current TIF rates per development type by TIF Zone.

**WHEREAS**, the collection process for improvement of roadways and intersections is set forth in Ordinance No. 5144 and in the TIM Fee Administrative Manual, adopted on January 24, 2017 by Resolution 001-2017.

### THERFORE, BE IT HEREBY RESOLVED,

- A. The Board of Supervisors hereby adopts the updated General Plan TIF Program fee schedule as shown in the attached Exhibit A, which shall become effective sixty (60) days following adoption of this Resolution, and the updated project costs as shown in the attached Exhibit C; and
- B. A map of the TIF Zones is provided in Exhibit B; and
- C. Applicants shall pay the TIF rate in effect at the time of building permit issuance or at the time of approval of an application for a change in the use of a building or property as provided in County Code Chapter 12.28 and the TIF Administrative Manual.

**PASSED AND ADOPTED** by the Board of Supervisors of the County of El Dorado at a regular meeting of said Board, held the <u>17th</u> day of <u>May</u> 2022, by the following vote of said Board:

Aves: Parlin, Thomas, Hidahl, Turnboo, Novasel
