To Whom It May Concern:

The purpose of this letter is to provide information regarding services that are provided to El Dorado Union High School District's Student Services Department by the County Surveyors/GIS Department.

Because of the fact that our high schools are impacted due to their enrollments, we have had to establish and hold to attendance boundaries for each of our schools. The GIS Department worked diligently with us to help us establish these boundary areas. They continue to faithfully provide us updated information regarding legal property owners. They maintain a website that allows for us and parents to be able to find a specific property and ensure the accuracy of the school attendance area that property is in. They have often created maps for us that are/were essential to our work. They have always been extremely responsive to any of our requests and we find the information they give us to be highly reliable as well as very important to the fulfillment of our responsibilities.

We have greatly benefitted from and highly appreciate the services the GIS Department has provided to this department within the El Dorado Union High School District.

Respectfully,

Steve Volmer  
Assistant Superintendent  
Student Services Department
