

30

El Dorado County Board of Supervisors
2010

November 9,

GIS is definitely not a discretionary item. It is the lifeblood of multiple systems within the county. Perhaps the solution to a portion of the budget problem is to increase the fee system for GIS services.

A second thought is to reduce the pay of the CAO until she has had the opportunity to educate herself to the GIS and it's existing symbiotic relationship with other county departments prior to suggesting which to maintain and which to eliminate.

Sincerely,

67
