

25

LATE DISTRIBUTION

DATE 8-16-11

If we could please get to the basic question presented on this agenda item: to create a Sacramento Placerville Transportation Corridor (SPTC) oversight committee. It is my understanding that the intent of this oversight committee would be to vet out many of the issues being presented in public comment. We need a place to start. I would suggest that this committee also further discuss the legal side bars regarding the JPA and their ownership of the rail.

I would agree with one of the persons providing public testimony, that there are some steps missing with regard to the legal aspects of removing the rails that have yet to be addressed. Answers to those legal questions will shed a better light on what can really be done in the corridor.

Hi Cindy,
Could you please send this to Suzanne to include in public comment from me ?

Thanks,
Norma
