Supervisor Knight -

I respectfully request an off-calendar continuance of the agenda item for acceptance of the HOV project (legistar 08-1388).

Caltrans has informed DOT that vehicle sensor nodes (VSNs) under the U.S. 50 pavement near the County line were destroyed during construction. Our records show that the contractor was directed to replace these destroyed VSNs in February of 2010. The contractor has not done so. The VSNs must be replaced prior to acceptance. I called the electrical subcontractor, and I was told that installation will be easy, but there is a lead time of several weeks on the VSNs themselves.

Please feel free to contact me if you have any questions or comments.

Thank you.

John Kahling, P.E.
Deputy Director, Engineering
El Dorado County Department of Transportation
Construction Division
