

THE  
NO TOUCH GESTURE  
INTERFACE FOR INTERACTIVES

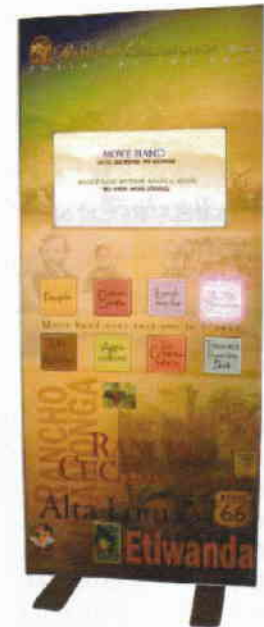

# [i]connect Kiosks

The [i]connect interactive kiosk is easy to set up and portable if desired. It is ideal for both permanent and traveling exhibits.

It is built in a 93"x39"x3" self standing aluminum frame with a custom printed fabric face and a fabric backing. The structure is Moss, Inc's EZFabric Wall System which makes it possible to expand the kiosk into a larger display by adding walls, structure and other accessories specifically designed for the EZ Wall System.

The interactive consists of 8 cell activation points, a Windows PC, and a 32-inch, 1366x768 resolution monitor with speakers. One power cord comes out the bottom. Special shipping cases are available for traveling units.
