

CAMERON PARK DESIGN REVIEW COMMITTEE

March 28, 2013

Mr. Jerry Barton
Senior Transportation Planner
El Dorado County Transportation Commission
2828 Easy Street, Suite 1
Placerville CA 95667

Dear Mr. Barton,

The members of the Cameron Park Design Review Committee fully support the El Dorado County Transportation Commission's 2013 Community Based Transportation Planning grant application for development of the Cameron Park Area Community Transportation Plan.

The Cameron Park Design Review Committee has worked with members of the Cameron Park community to develop a vision for the Cameron Park area that has a positive and lasting impact on the way the area develops in the future. The Committee strongly believes that transportation improvements will help establish the foundation for development of a vibrant and healthy community.

In May of 2010, local advocates, business owners, and community members attended the Cameron Park Envision 2030 Workshop. The workshop was a huge success. The information about community values gathered at the workshop was used to develop and adopt the Cameron Park Vision Statement for 2030. The vision statement has captured the essence of what the community desires for the future of Cameron Park. As included in our adopted vision statement, our community desires a transportation system that unifies Cameron Park. We desire a bike and pedestrian friendly transportation system with opportunities to increase transit use. We would encourage and support a bicycle and pedestrian system to interconnect with a regional park and trail system to support healthy and mobile lifestyles. We believe it is important to identify a walkable downtown that promotes economic vitality to the region. Within a transportation system, we desire and encourage the enhancement of safety and security measures in the community to achieve these goals.

It will take a plan to accomplish the important goals of the Cameron Park community. The comprehensive visioning work that has occurred through the leadership of the Design Review Committee is now complete. It is time to move to the next step. It is time to develop a detailed action plan that sets the framework for design of a transportation system that reflects our community values and includes actionable projects, cost estimates, and a funding strategy.

The members of the Cameron Park Design Review Committee strongly support your grant application for development of the much-needed Cameron Park Area Community Transportation Plan. Approval of this grant will help turn our vision into a reality.

Sincerely,
/s/ Dyana Anderly
