Subject: Mass, runaway addiction to alcohol and other drugs

To: bosone@edcgov.us

SUPERVISOR Ron Mikulaco DISTRICT ONE

I'm the man who confronted El Dorado County Mental Health over its policy of funneling substance abusers into recovery groups that indoctrinate newcomers into the false and counterproductive disease concept of antisocial behavior. I complained that El Dorado County denies informed consent (attached) to addiction treatment services and recovery group participation by refusing to inform them of viable alternatives to the ineffective and objectionable 12-step program of AA/NA, specifically Rational Recovery, a nationally recognized avenue to prompt addiction recovery with headquarters in El Dorado County.

During the years 2009 and 2010, I offered to provide El Dorado County courts and Mental Health Services programmed instruction and monitoring services at a negligible cost, but administrators Nielsen and Contois failed to bargain with me in good faith. I suggest that you look into the abstinent outcome data on county substance abuse programs, and inquire about the El Dorado County Planned Abstinence Program that was aborted by administration soon before it would have become a national showcase of innovative, budget-cutting services that dramatically reduce substance abuse and related social criminal problems.

El Dorado is witnessing a rising tide of substance abuse and mass, runaway addiction because county agencies and personnel are disinterested in teaching addicted people how to quit the use of alcohol and other drugs. They are completely committed to supportive and therapeutic services that have practically no bearing on continued self-intoxication, and are provided by programs that are nonsensical, unhelpful, or objectionable to practically all participants.

NOW, THE MAIN POINT OF THIS MESSAGE:

Please do not add to El Dorado County's dismal record in the area of substance abuse services by allowing *any* opportunities for marijuana cultivation and distribution within our borders. The marijuana movement is a tragic chapter in American history, a political movement supported by people who have contempt for traditional American values and for the human family. Marijuana is the source of social decay in every state, and every city, an affront to civilization itself. It is highly addictive, disables young people by robbing them of vitality and personal success. It sets them against their own family values and replaces family bonds with ties to the drug culture.

Pot's addictive properties are best seen in the zeal of social reformers who devote their lives to advancing the drug as a panacea for every spiritual, psychosocial, and medical problem. Pot becomes a religion in itself, a mirror image of the morality instilled by one's original family, the religion of the party animal, a lazy, antisocial being who scorns everything in the past, and has blind faith in the goodness of life under hemp.

Send the potheads and druggies away – far, far away – to ply their morbid trade anywhere but El Dorado County. Our children are their prey, children whose childhoods will end with their first toke of the weed that kills the human spirit and awakens animal desire to do what comes naturally without regard for consequences.

Surely, El Dorado County can get this one right. HEDONIC DRUGS ARE BAD. KEEP POT AND ITS GROWERS AND USERS AWAY FROM OUR NEIGHBORHOODS AND CHILDREN!

Informed Consent to Addiction Treatment and Recovery Group Participation

1. The disease concept of addiction is not factual but highly *controversial* in professional and scientific communities.
2. Independent recovery from addiction through planned, permanent abstinence is commonplace. According to official AA estimates, over 60% of all successful recoveries occur without recovery groups, professional counseling, or addiction treatment services.
3. The most realistic remedy for substance addiction is planned, permanent abstinence.
4. Your family, employer, and society may have a strong interest in you becoming securely abstinent, but how you achieve that is of no one's concern but yours.
5. Addiction is not caused by personal problems, but serious personal problems certainly result from addiction.
6. Self-improvement does not lead to abstinence, although abstinence results in self-improvement.
7. Recovery group meetings are public meetings, and no confidentiality should be expected.
8. Quitting something you love one-day-at-a-time is easy in the short run, but difficult in the long run.
9. Quitting something you love altogether – *for life* – feels difficult only as you do it, but feels good immediately and in the long run.
10. It is unproductive to blame your ancestors or original family for your adult behavioral problems
11. If you quit your addiction altogether, you will not likely develop new problems or switch to another addiction or substance. It feels good to solve a serious problem, and your future will look brighter.
12. Your own native beliefs and original family values are the best ones upon which to base addiction recovery.
13. Your desire for group or family support in order to remain sober conceals a plan to drink/use in the absence of support.
14. By choosing independent recovery, you are setting a higher standard for yourself, so you will experience a greater fall if you resume your use of alcohol and other hedonic drugs.
15. Addictive Voice Recognition Technique® (AVRT®) is a common means of independent recovery from substance addiction presented at the Rational Recovery website: <http://www.rational.org>.

To the Supervisors of El Dorado County,

I am writing to let you know that I oppose the outdoor cultivation and distribution of medical marijuana in El Dorado County. I hope you will represent the many tax-paying citizens of this county who do not want our county to be known as a marijuana-friendly county.

Once a county gets that reputation, several things usually happen: the area is flooded by growers, sellers, and buyers; people that are not involved in the drug industry leave the county as soon as they can; kids that graduate from school leave the county and don't come back; when people retire they move to other parts of the state or country; the county ceases to attract families looking for a safe place to raise their kids; since marijuana growers tend not to declare their income, the county tax base plummets and the demand on county resources escalates. If you need proof of this, please check into the effect that being marijuana-friendly has had on Mendocino County.

Please help our community become a safer place.

Thank you,
Carrie Strayer
Placerville

El Dorado County Supervisors,

Reference OR13-0001 and OR13-0002

It is of great importance to my family and I that you as representatives of this great county stand up and stop the continued growth of Marijuana growing fields and dispensaries within our neighborhoods. If I read the proposed OR13-0001 ordinance correctly, the passage of this ordinance will prohibit the growing and dispensing of marijuana within the unincorporated areas of the county. That I am in favor of. In fact, I am in favor of total abstinence of the growing and dispensing of medical marijuana within the county for multiple reason. The following are but a few of my reasons:

1. safety of families from growers/users;
2. potential illegal trafficking and use of marijuana;
3. influx of less than reputable individuals to the county;
4. impact on property values of homes within the county;
5. uninvited offensive odor of the product in neighborhoods.

As for the second proposed OR13-0002, I oppose it out rightly. Regulating more dispensaries and growing fields does not eliminate the growth of marijuana usage and only invites more growth of the substance and its usage.

Please stand up, as other county supervisors have, and eliminate the growing and dispensing of marijuana within El Dorado County. I moved to this county 26 years ago for one specific reason - it was a great place to raise children and grandchildren without the influence of the drug culture that had devastated much of the neighboring cities and parts of the country.

Thank you for considering my concerns about these two ordinances as proposed.

Sincerely,

David L Hoppe

3501 Sudbury Rd

EL DORADO COUNTY BOARD OF SUPERVISORS

I'm the man who confronted El Dorado County Mental Health over its policy of funneling substance abusers into recovery groups that indoctrinate newcomers into the false and counterproductive disease concept of antisocial behavior. I complained that El Dorado County denies informed consent (attached) to addiction treatment services and recovery group participation by refusing to inform them of viable alternatives to the ineffective and objectionable 12-step program of AA/NA, specifically Rational Recovery, a nationally recognized avenue to prompt addiction recovery with headquarters in El Dorado County.

During the years 2009 and 2010, I offered to provide El Dorado County courts and Mental Health Services programmed instruction and monitoring services at a negligible cost, but administrators Nielsen and Contois failed to bargain with me in good faith. I suggest that you look into the abstinent outcome data on county substance abuse programs, and inquire about the El Dorado County Planned Abstinence Program that was aborted by administration soon before it would have become a national showcase of innovative, budget-cutting services that dramatically reduce substance abuse and related social criminal problems.

El Dorado is witnessing a rising tide of substance abuse and mass, runaway addiction because county agencies and personnel are disinterested in teaching addicted people how to quit the use of alcohol and other drugs. They are completely committed to supportive and therapeutic services that have practically no bearing on continued self-intoxication, and are provided by programs that are nonsensical, unhelpful, or objectionable to practically all participants.

NOW, THE MAIN POINT OF THIS MESSAGE:

Please do not add to El Dorado County's dismal record in the area of substance abuse services by allowing *any* opportunities for marijuana cultivation and distribution within our borders. Mat Hutchings <mhutchings7@gmail.com>

Tue, Sep 24, 2013 at 7:45 AM

To: "bosthree@edcgov.us" <bosthree@edcgov.us>, "edc.cob@edcgov.us" <edc.cob@edcgov.us>

I am writing as a very concerned voter and constituent for our county about the board of supervisors meeting today. Unfortunately, I am unable to make it to the meeting as I am working as a Physician Assistant in a Family Practice in Placerville today caring for those in our community.

My wife and I have 5 children and feel that this will have a big impact on possible future issues.

Please stand strong with us to LIMIT growing options and PROHIBIT any dispensaries. There really is not any benefit to our community to have this rampant in the community. Safety issues are prevalent and will only worsen with increased ability to grow and dispense.

Thank you for listening. I wish I could be present, but hopefully our voice can be heard.

Mat & Carie Hutchings
