Dear Planning Commissioners,

Please support the proposed Public Project Notification with the suggested changes noted below.

The intent of the proposed Public Project Notification is to increase public participation in the early stages of a project. The community showed up in force at several workshops to support that intent and provide input. An increase in early public participation should lead to an increase in community satisfaction and reduce animosity between the public and the developer, and the public and the County. This will ultimately save the developer from wasting a lot time and resources on an unwanted project.

Suggested changes:

1. In each of the four places where "the project application may require a public outreach plan," change the word "may" to "shall."
2. Add a website and/or QR code to the physical sign posting.

Thank you for your consideration,

Lori Parlin

To: Planning Commissioners

Thank you for expanding the Project Notification to engage the public earlier in the project. I support the proposed increases for the expansion of public notice on projects to better involve the public in the process.

Ellen Katz
