Hi Char,

Please see email.

FYI.. I spoke with Aaron and he was going to print out and give to Julie.

Thanks, Debbie

S15-0001/Swansboro Verizon Cellular Tower asbestos review

To: Aaron Mount, Project Planner, and Planning Commission

I would ask that the related S15-0001 Environmental Study address asbestos and the environmental setting which was described "The site is accessed by One Eye Creek Road which is a privately maintained road".

One Eye Creek Road could contain asbestos, as the road runs through serpentine per the USDA Natural Resources Conservation Service web soil survey (Attached). The map Asbestos Review Areas, Western Slope, County of El Dorado, State of California 7/21/05 shows this access road as more likely to contain asbestos.

The California Department of Conservation informational brochure regarding Asbestos Map of Western El Dorado County states: A multi-agency task force found that most people in the area do not appear to be exposed to significant risks from naturally occurring asbestos, unless they are near sources of dust, such as unpaved roads. People living near these sources may be exposed to elevated levels of asbestos.

The Rule 223-1.1 purpose is to limit fugitive dust emissions from construction and construction related activities including ... travel on access roads.

Since tower construction and Verizon maintenance twice a month would go over unpaved One Eye Creek Road, it would benefit the area to know if there is going to be asbestos dust

in the air.

Perhaps, if not done already, a Professional Geologist can evaluate the area for Naturally Occurring Asbestos (NOA) and the information added to the Environmental Study.

Thank you,
Steve Dallosta, 901 El Dorado Way, 95819

Had to send to your regular email as this method would not allow all my comments.
