Subject Re: Property Development of Farren Project - September 23, 2008

Ms. Barton:

Thank you for sharing your concerns and suggestions regarding the proposed development in this area. I will see that Supervisor Dupray receives your email for his consideration. I will also forward this to the Board Clerk so your letter may be part of the agenda packet for this item.
Thank you.

Subject Property Development of Farren Project - September 23, 2008

Supervisors Rusty Dupray, Helen Baumann, James R. (Jack) Sweeney; Ron Briggs and Norma Santiago:

I respectfully request that you do NOT approve the Farren Project as approved by the Planning Commission. an enormous amount of controversy surrounding this project along with the Alta, Diamante Estates, Chartrav

There has been a tremendous amount of public opposition to the proposed design of the roadways. Last even Department of Transportation (DOT) and the County Planner to address the local residents. Needless to say

The Planning Commission has displayed many inconsistencies in the public hearings. Many of the issues cor without reaching the level of disappointment the residents now have. Anyway the roadways and traffic on M the main concern of the public.

The Farren Project could easily be accessed on Salmon Falls Road, as is the Farren Home. This would elimin Dixon Road which is already extremely dangerous and over used.

The proposed Circulation Map of El Dorado Couny that was provided by the DOT specific to the Malcolm E held September 16, 2008 has many benefits to the community and upcoming projects. The only request I hav

accessed on Salmon Falls Road. This was a concensus among the residents at the community forum meeting

The residents on Uplands Drive, Peggy Lane, Alta Vista and the many homes of the Arroyo Vista corridor on is onto Malcolm Dixon Road. The addition of the road from Green Valley Road East of the Morman Island (existing traffic from the Arroya Vista community from Malcolm Dixon Road (near Salmon Falls). It should be installed at this intersection in order to allow the traffic to access Green Valley Road. As stated by the Fir only once access route would not be approved with current regulations.

The contents of this request has been discussed with Jim Ware, DOT who is the supervisor for the project pl assured that further review would be made and our concerns be considered in these projects

If additional information is needed, please do not hesitate to contact me.
