

### Draft TDM Results - Scenario 3 Summary

**Historical Growth Rate with General Plan Distribution, RHNA (approximately 75% within the Community Regions and approximately 25% within the Rural Centers/Regions)**

***Summary of Potential Improvements Needed if Improvements identified in the 2013 Capital Improvements Program are not constructed***

\* Contains the same employment assumptions and data as Scenarios 1 and 3

ROAD NAME	SEGMENT	Gen. Plan Max LOS	Road Classification	Community Region (CR), Rural Center (RC), Rural Region (RR)	Year 2035	Year 2035	Potential Improvements Needed <sup>4</sup>	Rough Estimated Cost of Improvements (in millions) <sup>5</sup>	Comment
					WKDY AM PK HR	WKDY PM PK HR			
					LOS (Using HCM2010)	LOS (Using HCM2010)			
<b>LOCAL ROADS</b>									
GREEN VALLEY ROAD	County Line to Francisco Dr to Francisco	E	2A	CR	F	F	4AD - 4 lane divided arterial	\$0.0	To be constructed by the City of Folsom
	Francisco Dr to Salmon Falls Rd	E	2A	CR	D	F	4AD - 4 lane divided arterial	\$2.8	
SILVA VALLEY PARKWAY	US Highway 50 to Serrano Pkwy	E	2A	CR	F	D	4AD - 4 lane divided arterial	\$0.0	To be constructed with Silva Valley Parkway Interchange
WHITE ROCK ROAD	County Line to Manchester Dr.	E	2A	CR	D	F	4AD - 4 lane divided	\$19.1	
	Latrobe Rd to Silva Valley Pkwy	E	2A	CR	D	F	4AD - 4 lane divided	\$3.3	
<b>U.S. 50</b>									
WB	EDH Blvd/Latrobe Rd to Bass Lake Rd (Silva Valley Parkway after 2015)	E	2F	CR	F	E	Interchange and Auxiliary Lanes	\$10.2	
WB	Silva Valley to Bass Lake Rd	D/E	2F	RR/CR	F	E	Addition of Auxiliary Lane with possible Interchange Work	\$10.2	Cost only includes the Auxiliary Lane, not potential interchange work. Cost includes segment from EDH Blvd/Latrobe Rd to Silva Valley to avoid double counting costs
WB	Bass Lake Rd to Cambridge Rd	D/E	2F	RR/CR	E	E	Interchange and Auxiliary Lanes	\$30.6	Cost only includes the Auxiliary Lane, not potential interchange work
EB		D/E	2F	RR/CR	E	F			
<b>SR 49</b>									
SR 49	Missouri Flat Rd to Pleasant Valley Rd	E	2A	CR	D	F	4AU - 4 lane undivided	\$5.3	New CIP Project, may not be needed when Diamond Springs Parkway is constructed
<b>TOTAL      \$81.5      M</b>									

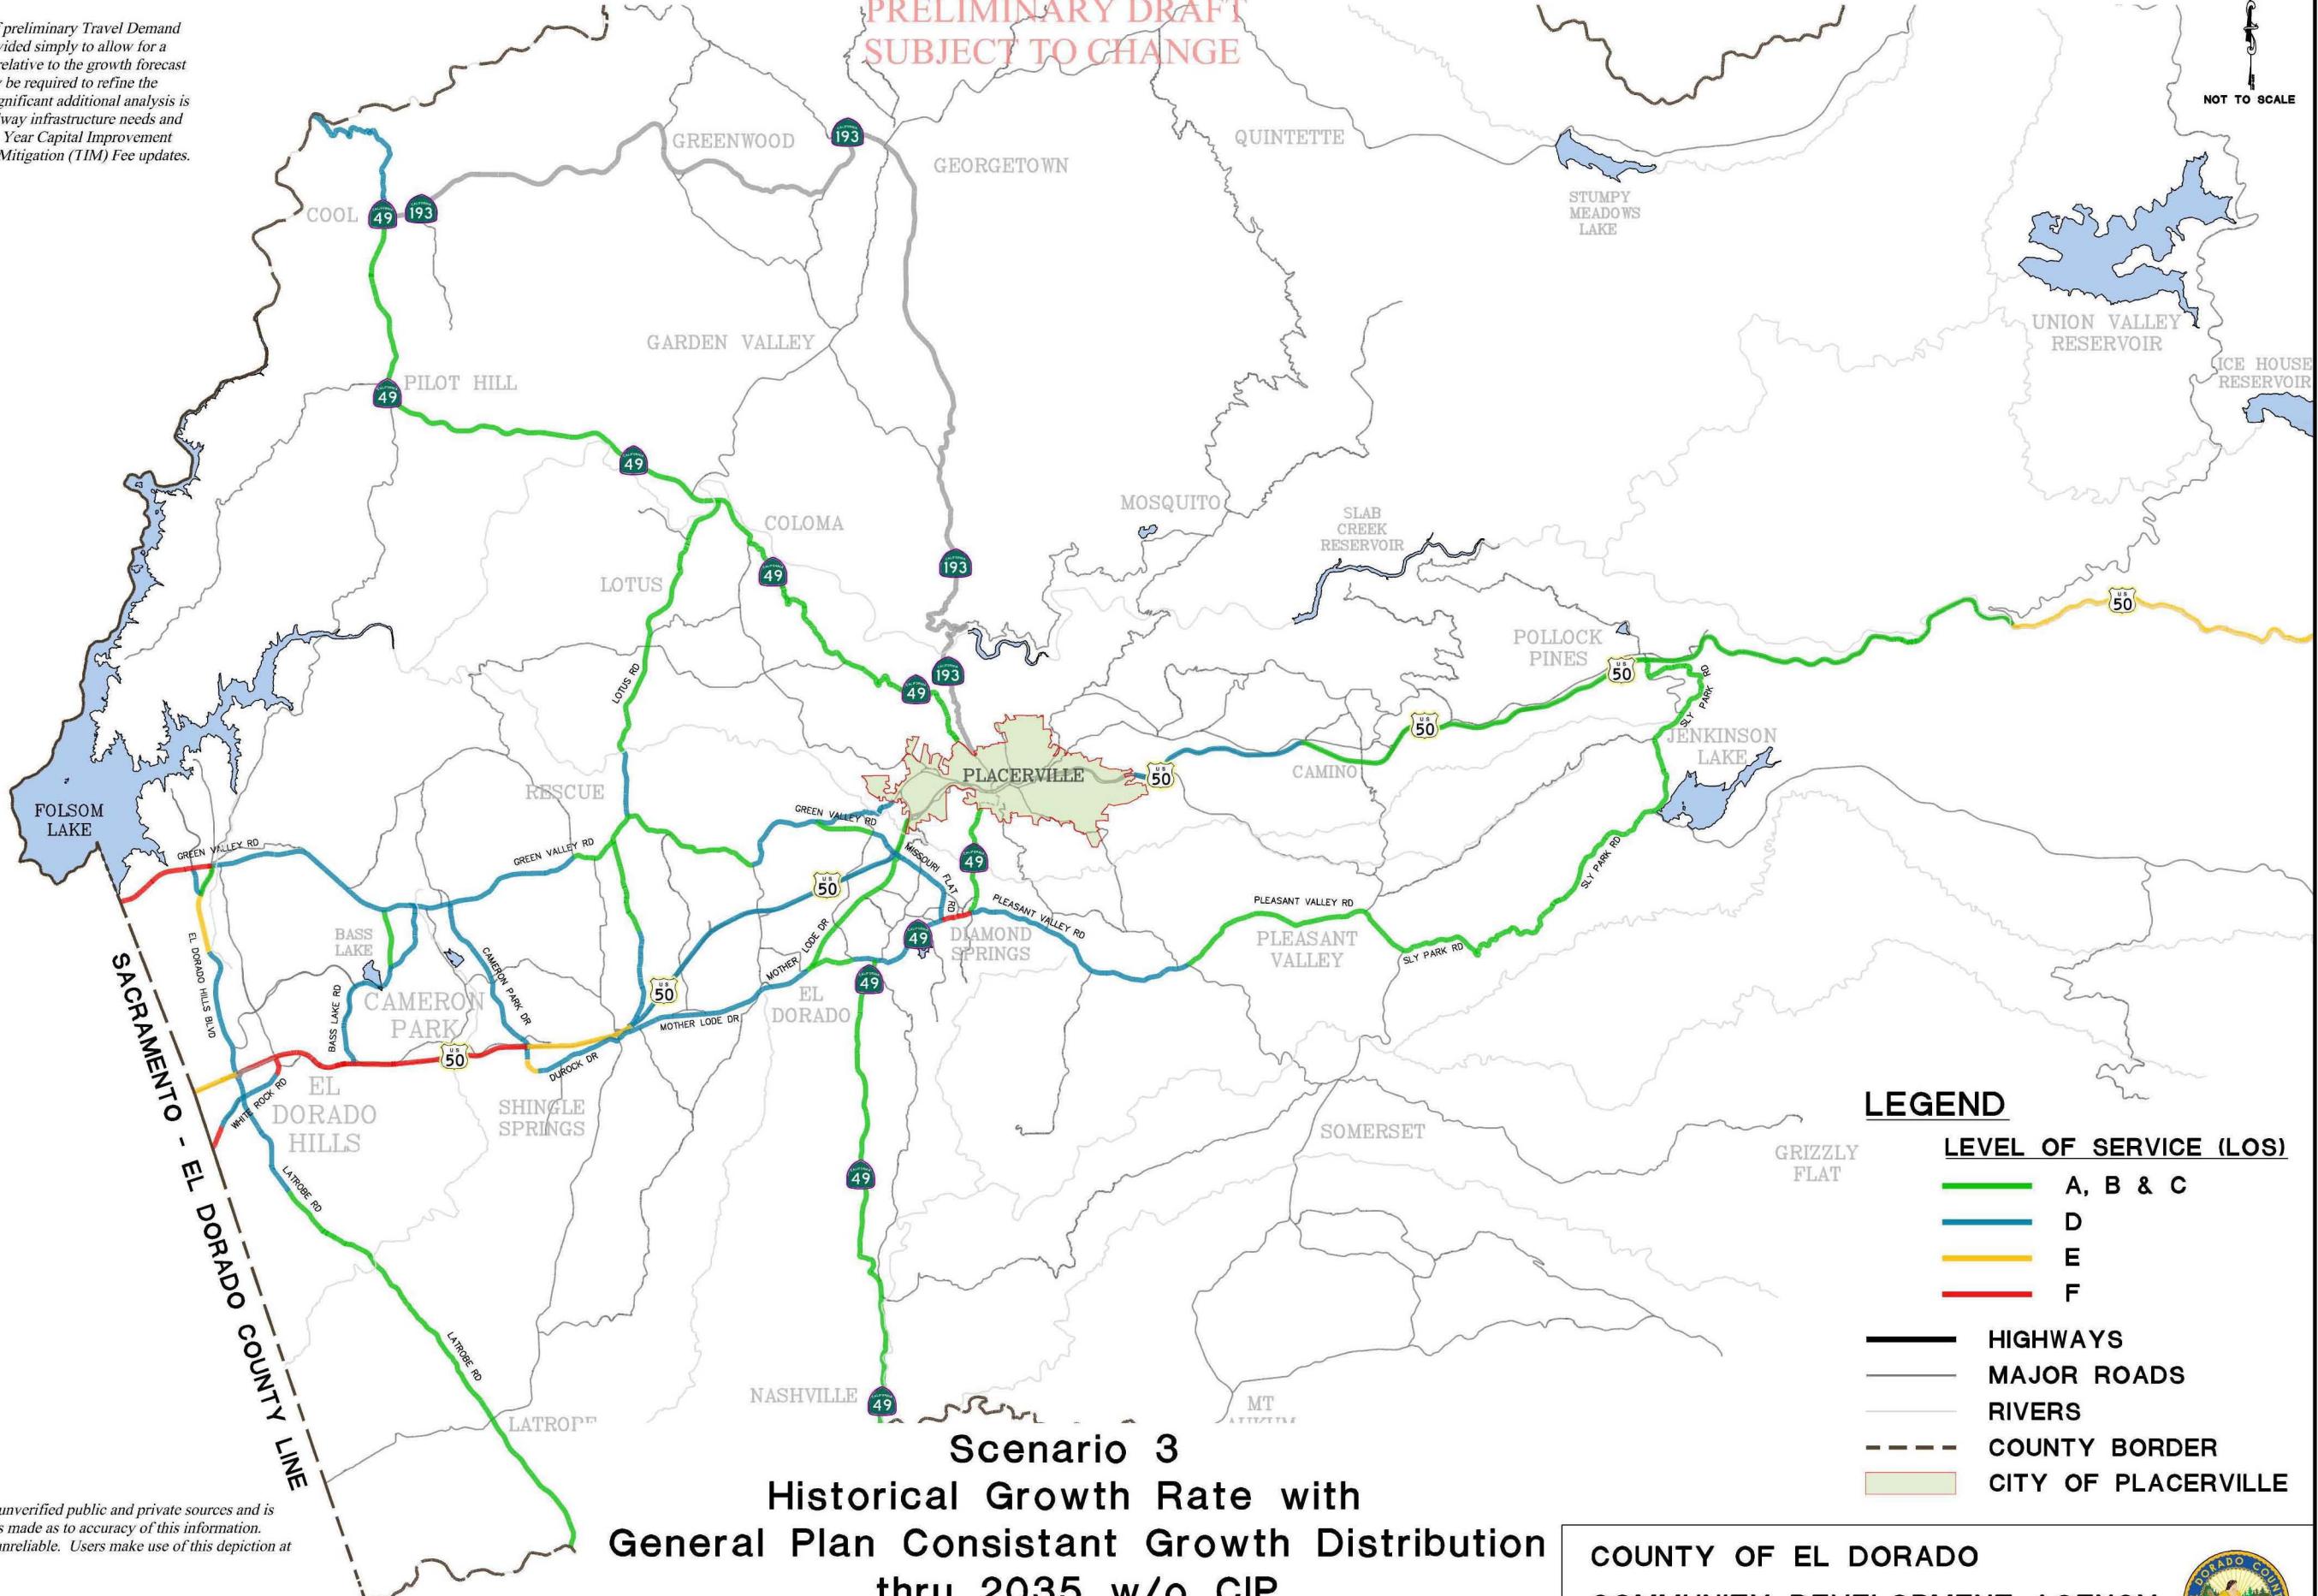

- Notes:**
1. Existing TIM Fee projects which have reimbursement agreements, in construction, completed is approximately \$325M. Some of the projects listed above, or portions thereof may be a part of the \$325M.
  2. The Historical Growth Rate is 1.03% Based on BAE Urban Economics Report as shown in Attachment I.
  3. Scenario 3 includes the Regional Housing Needs Allocation (RHNA)
  4. This Draft information is a result of preliminary TDM runs; it is being provided simply to allow for a comparison of potential outcomes relative to the growth forecast scenarios. Significant additional analysis is required to determine detailed roadway infrastructure needs and associated costs for the Major Five Year Capital Improvement Program (CIP) and Traffic Impact Mitigation (TIM) Fee updates.
  5. The draft estimated costs shown are very rough ballpark estimates. These estimates were created using the methodology used for the 2004 General Plan TIM Fee update, with lane-mile costs updated to reflect costs used in the County's 2013 CIP for projects in the 10- and 20-year CIP. These ballpark estimates do not take into account project-level details that are unknown at this time, including but not limited to: damages as a result of right-of-way acquisition (e.g. required purchase/displacement of homes, businesses, drainage or utility structures), the requirement of additional drainage facilities, retaining walls, etc. This draft information is being provided simply to allow for a comparison of potential outcomes relative to the growth forecast scenarios. Significant additional analysis is required to determine detailed roadway infrastructure needs and associated costs for the Major Five Year Capital Improvement Program (CIP) and Traffic Impact Mitigation (TIM) Fee updates.

**DISCLAIMER:**

This draft information is a result of preliminary Travel Demand Model (TDM) runs; it is being provided simply to allow for a comparison of potential outcomes relative to the growth forecast scenarios. Additional analysis may be required to refine the Level of Service (LOS) results. Significant additional analysis is required to determine detailed roadway infrastructure needs and associated costs for the Major Five Year Capital Improvement Program (CIP) and Traffic Impact Mitigation (TIM) Fee updates.

EL DORADO COUNTY TDM - Roadway Capacity Analysis Tool						
KEY						
2004GP Model	Old County Macro Traffic Model					
2013GP Model	New County Macro Travel Demand Model (TDM)					
HCM2000	<i>Highway Capacity Manual 2000</i> , Transportation Research Board					
HCM2010	<i>Highway Capacity Manual 2010</i> , Transportation Research Board, December 2010					
LOS	Level of Service (LOS generalized definitions from the 2004 General Plan are listed below)					
LOS A, B or C	LOS A is free-flow speeds with freedom to maneuver; LOS B stable operating conditions; LOS C stable operating conditions with individual users affected by interactions with others.					
LOS D	LOS D represents high-density, but stable flow					
LOS E	LOS E represents operating conditions at or near capacity.					
LOS F	LOS F is used to define conditions where the volume of traffic exceeds the capacity of the roadway. Long queues can form behind bottleneck points.					
WKDY AM PK HR	Weekday PM Peak Hour					
WKDY PM PK HR	Weekday PM Peak Hour					
Year 2010	Baseline year for the New County Macro TDM					
Year 2025	20-year forecast date of the Old County Macro Traffic Model					
Year 2035	20-year forecast date for the New County Macro TDM					
BASS LAKE ROAD, NEW	Names in light blue indicate a future new road that has not been constructed.					
NOTES:						
1.	Level of Service (LOS) is a general measure of traffic operating conditions of a roadway where a letter, from A (best) to F (over capacity), is assigned.					
2.	General Plan Policy TC-Xd defines the maximum LOS as LOS E in the Community Regions or LOS D in the Rural Centers and Rural Regions, except for those specified in Table TC-2.					
3.	LOS in this table uses the thresholds based on the Highway Capacity Manual 2010 (HCM2010)					
4.	LOS is calculated for Weekday AM and PM Peak Hours					
5.	LOS in this table assumes roads configurations are as of 2010 or are in construction by 2013.					
6.	State Route Volumes are from Caltrans website and additional actual count data was provided by Caltrans staff, all other counts are collected by County staff.					
7.	Volume Projections from the 2013GP Model in this table were rounded to two significant figures.					
8.	All Scenarios include RHNA (Regional Housing Needs Allocation) as required by State Law and General Plan Housing Element					
HCM 2010 Planning Level Volumes <sup>1</sup>						
	Code	Functional Class Codes (Updated to HCM 2010)	A	B	C	D
	2A	Two-Lane Arterial	-	-	850	1,540
