

CONSENT - PUBLIC COMMENT  
L. PARLIN  
3/7/17

3-7-17 BOS Consent Item #14, File #14-0073

Joel Korotkin appeared shocked that his Dixon Ranch project was denied, even though he had said several times over the years that he knew he was taking a risk by moving his project forward.

I would like to know if Parker Development has been reminded that there is no guarantee that their projects will be approved after spending a lot of resources on their projects. Have they been reminded of the risk?

This contract is for another 3 years. How long does the public have to endure the uncertainty of whether these projects are coming? What can you do to help both the developer and the public get past these monstrous projects and focus on our roads and public health and safety? Where is that breather that we talked about back in 2013?
