Commissioners—

Please reschedule the Biological Resources Policy Update/Oak Resources Management Plan hearing to an April 13, 2017 meeting date to allow the public additional time to review the final EIR for this project.

The final EIR was not released to the public (or at least, not to me) until the afternoon of March 8, 2017. This 580+ page document will require time to review. Since it's likely the majority of the public commenting on this project have other obligations (job, family), it's safe to assume more time would not only be appreciated, but is necessary to facilitate careful review.

This is an important project that will irrevocably impact the County's biological resources—it deserves thorough and thoughtful consideration, and the participation of all who took the time to comment.

Thank you in advance for your consideration of this request.
