Re: Oak Resources Management Plan and Resources Policy Update

Dear Planners,

California Wildlife Foundation and California Oaks have sent you Resources and Oak Woodland Plan comments, which seem to be ignored at every turn. We have tried to be on your side to keep you from flaunting statewide laws.

The best thing you could do, if you truly want to represent your county's interests, would be to STOP these policies and reassess the overall damage they will do if they keep moving forward.

The plan to effectively demolish your oak woodland wildlife habitat and increase pressure on the warming climate, while polluting streams, and dirtying the air, will not be in the best interest of your voters and landowners, their children, or grandchildren. It will be economically and environmentally costly by every measure.

Please be serious about following the laws of our state which were enacted to protect the health and economic wellbeing of your constituents. The "cheap dirt" myth being perpetuated in your county will demolish your natural capital, which every day becomes more valuable in the statewide context.

Thank you for your consideration.

Sincerely,

  
Janet Cobb, Executive Officer
