

Please route this letter to:

**Evan Mattes** (Planning);  
**Bill Draper** (AgComminson - Forestry);  
**Brian Veerkamp** (Supervisor District 3)

This letter is to provide background information on the El Dorado County Agriclutural Commission's review of a project application **No. ADM18-0116/Krumwiede Setback Relief**.

The APN for the parcel is **096-100-26**.

I feel the missing information in this request for a project review, is the unnamed person, responsible for funding the purchase of this parcel. His name is **Greg Schaefer**, who in the mid to late 1990's was a general contactor, as well as a owner operator of "Schaefer Logging". During those years he was investigated, and had fines (liens) placed on a parcel off of Jim Valley Road.

His disregard for county and state regulations included unpermitted grading of private roadways and building sites; the construction of a illegal, unpermitted earthen damn on a tributary to Weber Creek; illegally citing timber from a unpermitted harvest, as added timber for an unrelated harvest plan; and last but not least there were court cases involving timber harvest/real estate fraud.

Please take the time to check the county files on this person before granting yet one more exclusion to more county and state regulations.

Thank you.

A life-long resident of Jim Valley area, representing myself, as well as many other families on Jim Valley Road.
