Staff has received multiple public comments with multiple concerns regarding the project. This memo is to address the concerns presented by the comments.

## Topic 1: Radiofrequency Health Effects:

1. The Federal Communications Commission Telecommunication Act of 1996 states that, "No State or local government or instrumentality thereof may regulate the placement, construction, and modification of personal wireless service facilities on the basis of the environmental effects of radio frequency emissions (Exhibit I of Staff Report) to the extent that such facilities comply with the Commission's regulations concerning such emissions." Radio Frequency reports submitted by the applicant demonstrate that the RF emissions for these facilities are below maximum federal standards.
