To Whom it may concern:

I am against granting permission for the Digital Monument Sign for the following reasons:

1. These types of signs are distractions to drivers during all times of the day. When driving, our first obligation is to devote our attention to that task. A sign of this type and near three schools unnecessarily puts children at risk.
2. The light level of these signs at night reduces the ability of the eyes to see hazards. Night vision is important when driving and impairing it shouldn't be allowed. I believe that the County should take steps to stop any new signs of this type from being placed into service through out the county.
3. The light pollution these signs generate greatly impacts homes near them at night.

Respectfully,
James M. Jowski
