<u>Purpose</u>

The purpose of the Capital Improvement Program (CIP) is to provide strategic direction regarding DOT's capital project priorities over a 5 to 20 year horizon. (A 20 year horizon applies to road improvement projects and a 5 to 10 year horizon applies to all other projects.) The CIP is a planning tool that DOT updates annually as new information becomes available regarding priorities, funding sources, project cost estimates and timing. While the CIP contains financial information for the current fiscal year, it is not intended to be a document for budgeting purposes.

Introduction

This document includes the following CIP programs that the Department of Transportation (DOT) is responsible for¹:

- 10 Year West Slope Road/Bridge Capital Improvement Program (CIP),
- 5 Year Capital Overlay and Rehabilitation Program (CORP),
- 5 Year Tahoe Environmental Improvement Program (EIP),
- 10 Year Airport Capital Improvement Program (ACIP),
- 5 Year Parks & Trails Capital Improvement Program.

These programs were reviewed and discussed with the Board of Supervisors in a workshop held on January 25, 2010; DOT was directed to return with the completed CIP based on the discussions at that workshop. Specific to the 10 year West Slope Road/Bridge CIP, the Board gave DOT direction to proceed with changes presented with the following modifications:

- Complete the Planning and Design activities for Headington Rd Extension (#71375) in FY 10/11 instead of in FY 14/19;
- Add a new project to connect Palmer Dr. to Wild Chaparral Dr. (#71365);
- Add two new safety projects, based on DOT's receiving two new grants from the Highway Safety Improvement Program (HSIP):
 - o Cold Springs Rd at Mt. Shasta Ln Realignment (#73360),
 - o Salmon Falls Rd at Glenesk Ln Realignment (#73362).

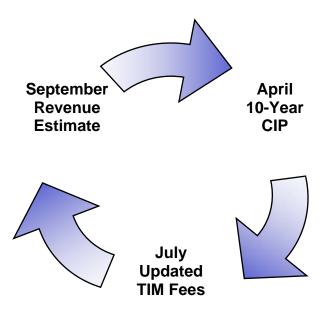

¹ DOT is also responsible for Facilities; a CIP for this area is being developed under the leadership of the CAO's Office and will be forthcoming later in 2010 under separate cover.

DOT CIP Annual Updating Process

All DOT CIP programs are reviewed and updated annually, including revenue estimates and project costs and schedules. The programs are presented to the Board of Supervisors for discussion and adoption.

The CIP forms the basis for DOT's budget for the upcoming fiscal year. In the case of the 10 Year Road/Bridge CIP, the CIP forms the basis for the annual Traffic Impact Mitigation (TIM) Fee Program cost update which is brought back to the Board in May after the CIP is adopted so that new fees are effective with the beginning of the new fiscal year.

In September, DOT returns to the Board for approval of Revenue Estimates, based on updated revenue assumptions.
