Dr Williams:

I am sure you have a very capable staff but I do not understand why basic trend data is not posted on the El Dorado County Covid Website. Trend data would certainly make it easier to understand what is happening in our County. It took me all of five minutes to locate public data and create a graph that could easily be posted online. Your staff already have access to this data. Why is the Public not being provided basic statistical data that the average High School student could create in just a few minutes?

Please provide the Public this helpful information and act accordingly in your decision making. An obvious exponential growth in the infection rate is not something we should ignore or hide.

Sincerely,  
Scott Ramirez
