Hello, I'm confused by the information on the state website specific to our county. According to our county numbers listed on this site, we should fall in the moderate level. However, the state has our county listed under the substantial level. There appears to be an error or am I missing something? I've included snap shots below for your reference.

Thank you

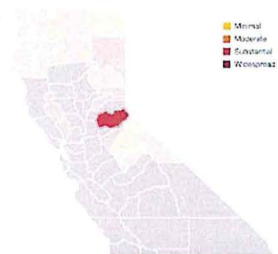

Understand your county's status

Every county in California is assigned to a tier based on its rate of new cases and positivity. At a minimum, counties must remain in a tier for at least 3 weeks before moving forward. Data is reviewed weekly and tiers are updated on Tuesdays. To move forward, a county must meet the next tier's criteria for two consecutive weeks. If a county's metrics worsen for two consecutive weeks, it will be assigned a more restrictive tier. Public health officials are constantly monitoring data and can step in if necessary.

El Dorado County Metrics

3.4
New COVID-19
positive cases
per 100K

3.5%
Positivity Rate

- Minimal
- Moderate
- Substantial
- Widespread

County risk level	New cases	positive tests
<p>WIDESPREAD</p> <p>Many non-essential indoor business operations are closed</p>	<p>More than 7</p> <p>daily new cases (per 100k)</p>	<p>More than 8%</p> <p>positive tests</p>
<p>SUBSTANTIAL</p> <p>Some non-essential indoor business operations are closed</p>	<p>4 - 7</p> <p>daily new cases (per 100k)</p>	<p>5 - 8%</p> <p>positive tests</p>
<p>MODERATE</p> <p>Some indoor business operations are open with modifications</p>	<p>1 - 3.9</p> <p>daily new cases (per 100k)</p>	<p>2 - 4.9%</p> <p>positive tests</p>
<p>MINIMAL</p> <p>Most indoor business operations are open with modifications</p>	<p>Less than 1</p> <p>daily new cases (per 100k)</p>	<p>Less than 2%</p> <p>positive tests</p>

EDC cases and positivity in moderate range - why are we in substantial tier?

Dear County Supervisor(s),

Do you have any clarity from our State as to when we can move tiers based on our data?

According to the below website, when I click on our county it shows a 3.6 new case rate per 100K and 3.6% positivity rate, which is in the range of "moderate" (orange) but they classify us as "substantial" (red)?

<https://covid19.ca.gov/safer-economy/>

Also below lists the EDC positivity rate at 3.1% as of end of day Friday and the dashboard there seems to put EDC in moderate range for cases prior 14 days?

<https://edcgov.us/Government/hhsa/covid-19-cases>

Any clarity would be helpful as the moderate tier makes a substantial difference (no pun intended) for our essential faith communities and businesses reopening, which I know is important to you.

Thanks
