Subject: Hotel Covid non compliance - disgusting!
To: Karl Weiland <karl.weiland@edcgov.us>

Hi,

I was told by the DCA that I should contact you about Covid non-compliance in the area. Well, basically every hotel in South Lake Tahoe has continued to be completely full after the stay at home order. They are even fraudulently checking people in, having them sign agreements that they are either staying 14 days or essential workers or homeless people when they are NOT. This is absolutely unbelievable. They need to be audited now. The way this county and town have handled this pandemic has been an absolute DISGRACE. You care NOTHING about keeping us locals safe. Even the sheriff is publicly saying that they won't enforce Covid rules! The CORRUPTION in your administration is frankly disgusting.

Restaurants down in heavenly village are planning a secret meeting to keep having indoor/outdoor dining, etc. But I bet you guys won't do anything about it!

Ski resorts have not been more full - AFTER a stay at home order! These are NOT all people taking day trips.

See attached photos of whistle blowers from hotels and the "agenda" for the restaurant owners meeting.

Have a heart and do what's right for once. Don't look the other way. This is inexcusable. Hospitals are flooded and doctors/nurses/EMTs are at the edge of their rope, physically and mentally. How can you possibly not care about us.

Boards of Supervisors,

In this morning's Covid Update Nancy Williams said that it would be a waste of Public Health Resources to provide the requested information on the Amplification Cycles that are being used during the PCR tests. This is unacceptable. She stated that there is no reason to investigate the reliability of these tests but there absolutely is reason to believe that they are unreliable.

In the month of November we had over a 1000 new cases in El Dorado County and not a single new death. Either Covid19 is not as deadly as was first explained or these tests are throwing false positives. Dr. Fauci, Elon Musk and others have both been critical of the PCR tests, especially PCR tests that use an amplification cycle of 35. The Public has a right to know. These test results are being used to determine quarantine and shutdown of people's lives. We need immediate action in getting this information.

Also this morning Nancy Williams said in response to a public comment that hospitals were not getting funded per the amount of COVID cases within the hospitals. This statement seems to be incorrect as per the [hhs.gov](https://www.hhs.gov/about/news/2020/05/01/hhs-begins-distribution-of-payments-to-hospitals-with-high-covid-19-admissions-rural-providers.html#) link below states hospitals/medical facilities are being funded per Covid cases. Also see attached funding breakout. It looks like California was allocated over \$600,000.00 in funding to healthcare facilities and hospitals.

COVID-19 High-Impact Allocation

COVID-19 High-Impact Allocation: HHS is distributing \$10 billion to 395 hospitals who provided inpatient care for 100 or more COVID-19 patients through April 10, 2020, and will distribute an additional \$2 billion to these hospitals based on their Medicare and Medicaid disproportionate share and uncompensated care payments.

Provider Relief Fund COVID-19 High Impact Payment Allocations May 1, 2020		
State	Providers	Payment
AL	5	\$70,087,478
AR	1	\$8,881,583
AZ	2	\$23,248,674
CA	13	\$231,583,318

WI	2	\$32,105,242
SUM	395	\$12,000,000,000

Low Income and Uninsured Patients

HHS is distributing an additional \$2 billion to these 395 hospitals in proportion to the amount of care they provide to low-income and uninsured patients. This funding will provide these hospitals with additional, proportionally greater funding to purchase equipment, hire additional staff, and procure other needed resources to care for patients during the COVID pandemic. The table below highlights areas across the country that will receive the largest portion of the \$2 billion distribution.

\$2 Billion Distribution to Hospitals Treating Low-income and Uninsured Patients

By State	
NY	\$686,681,434
NJ	\$137,657,146

Board of Supervisors,

While you may think you are saving lives by locking down/stay at home orders, the county of El Dorado along with the state of CA is at fault for every failed business, due to the lack of validation of the PCR tests and amplification cycle reporting. We are all aware of the stories of people getting tested on the same day, same tests, and having both positive and negative results. We are all aware of the question of 'how reliable are the PCR tests' - but neither El Dorado County nor the state of CA have taken the time and effort to research the facts and standardize testing across the county or state.

When will El Do county stand up and demand labs to standardize and report:

-Labs experience and history of pcr testing (reliability)- many labs 'popped' up to capitalize on the testing craze. What labs are reporting to El Do county and what is their experience? We should only be accepting results from experienced, established labs. If you are not mandating the labs to provide this information, El Do county and the state of CA is being negligent and basing shut downs on results from labs that may not be adhering to best practices to ensure the most reliable results.

-Labs to confirm receipt of test kits at required temperature for efficacy - PCR tests must stay around -20 c for efficacy. How do you know that the tests that are being utilized have not come above the temperature during transport to the labs, or in the labs, which would render them ineffective? Do you require all reporting labs to maintain records/proof of correct temperature/handling? Do they utilize a test kit even if they are aware it has been out of the required temperature range? If not, El Do county/state of CA is being negligent and basing shut downs on numbers that may be extremely unreliable due to void test kits.

-What machine and test kits are they using. Tests vary widely. Using a test on a machine that is not calibrated for that particular test can throw false positives or false negatives. Are you requiring all reporting labs to maintain and verify that the machines are calibrated for the test kits they are using? If not, El Do county/state of CA is being negligent and basing shut downs on numbers that may be extremely unreliable.

-Machines are calibrated appropriately for the test kits being used - same as above. I am personally aware of an individual who supplies test kits to many labs across the USA and is fully aware of labs utilizing test kits with the wrong calibration, resulting in both false positives and false negatives.

-Whether or not the testing machines are automated or by human hand. Most tests are manually processed, leaving room for human error. The slightest bump of the tray can cause cross-contamination. If you are not requiring labs to report whether they are automated or manual, then El Do County/State of CA is being negligent, and basing shut downs on results that may be unreliable. Should we demand to receive results only from labs that are automated? It would be more prudent, to ensure the most accurate results.

- Amplification cycles - should be reported along with test results. We all know that cycling above 35 can create false positives. Are you demanding this information with test results? If not, you are being negligent and basing shut downs on results that may be unreliable.

-Making baseline data transparent when reporting results - all of the above should be researched and required reporting as a 'best practice' to ensure we are not blowing up 'positives' and thereby destroying the livelihoods of the people of this county/state unnecessarily. When we have 1000 new positives in Nov but 0 deaths, it appears we are receiving erroneous results or covid is not as deadly as govt makes it out to be.

If you are going to shut the county down based on 'positive' cases, it would be prudent to ensure that labs are required to meet standards and protocols to ensure we are not harming our residents based on false positives due to inconsistent testing and over cycling the tests. Your attention and diligence to this issue is appreciated. Don't be lazy. Lives are at stake.

I look forward to your comments.

Dear Board, I strongly agree with Keely. Plus, I have been told from a nurse at Marshall that the hospital scaled back on their nurses this summer because of low patient numbers and profits from lockdowns. The nurse felt their patients were in danger because of the staff shortage all of these months in 2020.

Please add this to the public comment on agenda on item 17.

El Dorado County has had 42,782 tests done. Nancy Williams has not answered the question as to what amplification cycles are being used during that test process. I find this incredibly disturbing. These tests are being used to quarantine people and shut down our society. Shouldn't we be sure of their accuracy? We have had over a 1000 new cases in the month of November and not a single increase in fatalities, with that remaining at just 4. This either shows us that the virus is not as dangerous as was first explained or there are some serious concerns over the PCR tests being used.

Failure by the county to do it's due diligence surrounding these tests and by continuing to fund these tests with public funds creates grounds on Misuse of Funds and Liability for the negative impacts suffered by businesses resulting from restrictions imposed due to our increase in case counts..

In 2018 El Dorado County had 33 deaths from the Flu. There was no shutdown or response by the government, what has changed? The current help to people and businesses suffering from these shutdowns such as Sales Tax deferred payments and Mortgage Forbearance programs seem predatory in nature. These payments are becoming due in the form of balloon payments as soon as the forbearance/deferred period is over. This Covid19 response seems to be less about health and more about attacking the middle class by destroying small businesses and killing jobs. With mortality numbers remaining low the new fear tactics have been on hospital capacity and their ability to care for people. We need to also look at this with skepticism. Is the hospital incentivized by Cares dollars? Is there an increase in capacity over previous years? If the staffing is low, is it because they have scaled back staff because of the low demand on other services like surgeries? Are the cases of Covid in the hospitals from people that arrived because they were experiencing Covid symptoms or because they were there with other health problems but then tested positive? As the policy is to test all people at the hospitals.

I understand there is a lot of fear surrounding Covid and that you all are in a very tough position as some people want to remain locked down. I hope you look at the larger picture and see the great news of survivability that we are experiencing in this county and that outlook gives you the bravery to adopt The Healthy Communities Resolution and take back local control of the Covid19 response. That decision has the power to save our businesses, livelihood and community. We desperately need that kind of leadership at this time. Thank you.

Keeley Link, resident of Placerville

Hello BOS,

2018 flu deaths: 33. No shut downs, no stay at home orders, no masks.

2020 covid deaths: 8. Why are we allowing business to fail and promoting fear?

El Do county population: 192,843

Covid 'positives': 3669.

That's .01 % of our county's population. How many businesses have failed? How many people are without an income this holiday season and winter? How many children have parents without an income in our county now? When will this county promote a positive, healthy response rather than a response based on irrational fear?

El Do county deaths: .002 % of positive cases.

How many people have lost a business and are without an income?

Our county should be managed better.

Susan Pendzinski
Pilot Hill

El Dorado County has had 42,782 tests done. Nancy Williams has not answered the question as to what amplification cycles are being used during that test process. I find this incredibly disturbing. These tests are being used to quarantine people and shut down our society. Shouldn't we be sure of their accuracy? We have had over a 1000 new cases in the month of November and not a single increase in fatalities, with that remaining at just 4. This either shows us that the virus is not as dangerous as was first explained or there are some serious concerns over the PCR tests being used. Failure by the county to do it's due diligence surrounding these tests and by continuing to fund these tests with public funds creates grounds on Misuse of Funds and Liability for the negative impacts suffered by businesses resulting from restrictions imposed due to our increase in case counts..

With mortality numbers remaining low the new fear tactics have been on hospital capacity and their ability to care for people. We need to also look at this with skepticism. Is the hospital incentivized by Cares dollars? Is there an increase in capacity over previous years? If the staffing is low, is it because they have scaled back staff because of the low demand on other services like surgeries? Are the cases of Covid in the hospitals from people that arrived because they were experiencing Covid symptoms or because they were there with other health problems but then tested positive? As the policy is to test all people at the hospitals.

Keeley Link, resident of Placerville
