Agree with Keeley 100 percent. Placer county schools have been opened to in person school for most of this "pandemic". So why are El dorado County schools still mostly on-line?
 We need to know how accurate these COVID tests are so that we can make wise decisions regarding our health policies. So far, that hasn't happened.
 Most of the public health policies so far since the beginning of COVID have been knee jerk reactions at best and have done much harm to our kids, the elderly in care homes, and small businesses.

Hello Supervisor Turnboo,

As you know I have been protesting Public Health in hopes of getting transparency surrounding Covid 19. I have been asking Nancy Williams for months to provide amplification cycles used in the PCR tests. She has refused to inquire with the labs to get that information, not even the lab paid directly by El Dorado County. I called into the BOS meeting last Tuesday and asked again, as there is real concern over false positives when more than 35 amplification cycles are

used. Nancy addressed that question by saying she isn't concerned if there are false positives, as she is just looking for overall trends.

That is a horrible response because people that have been given a false positive are having their lives turned upside down. A fellow kindergartner of my daughter was quarantined for roughly 28 days from school because her father tested positive, his only symptom was loss of smell/taste and he aired on the side of caution and got tested. My understanding is that it was public health policy that he/family be quarantined for 14 days and then the family/children needed to quarantine for an additional 14 days.

I am also very concerned at how Covid deaths are being tracked and counted. It has been said that deaths have been counted of persons that were in hospice care dying of other things, like cancer. How can the public have confidence these deaths are being reported accurately?

Also as I mentioned in my comment at last week's meeting, hospital capacity figures are very vague. I would like to see transparency using bed counts, current counts vs. previous years. Capacity using staffing capability can be skewed by hospitals choosing to not adequately staff the hospital for whatever reason.

I really appreciate your help in these matters and I look forward to next Tuesday's meeting.

--

Thank you,
Keeley Link

Supervisor Turnboo & Supervisor Parlin,

I concur with these statements as well. The draconian measures being taken regarding corona virus have no basis in science and the data bears this out. Excellent compilations on data can be found at www.rationalground.com

I believe that the county public health officer needs to be reminded who she works for. Her salary and those of her co-workers are paid by us, the taxpayer. She has no right to withhold information regarding the cycle thresholds related to the PCR testing in El Dorado County. No one is asking for specific business entities to be identified by name. We want the number(s). All of us are fully aware of the manipulation of these tests and the over amplification which is resulting in a very high percentage of false positives. This testing data is being used as the basis for putting people out of business and related job losses.

The state of California and foremost Governor Newsom have proven to be abject liars regarding anything and everything related to Covid, and it's clear to all the restrictions in place are done out of a desire to control the population and create fear. There is nothing in the constitution that allows for this. In the short term we cannot change the state, but the county needs to be responsive to the citizens. Take a look at how Florida is handling the virus. Their numbers are far better and there are virtually no mandates throughout the state.

Thank you for your consideration.

Thank you Keely for spear heading this drive.

Deana Visentin

Subject: Re: Covid 19

Supervisor Turnboo - I agree with Keeley and the Rogers statements. I would like to add my own thoughts as well.

The initial death toll predicted (2.1M deaths in America) was way off which is a good thing. So I must ask "why are we still enforcing safety protocols based on that false prediction?"

Why are we doing life long serious harm to our fellow citizens in EDC? From our children all the way to our seniors - people are being harmed for a virus where 99.98% of people who get it RECOVER?

Every single person in EDC who is enforcing these "rules" are guilty of committing crimes against humanity. From our children's failing grades, suicides, increased addiction, domestic abuse, child abuse, closed businesses, people losing their homes and our elderly dying alone -isolated from their loved ones.

Shame on every one who is continuing this horrible sick game.

Thank you,

Rose Chilcoat

Thanks for your reply,
I haven't received a response yet.

The questions I have are listed here, forgive me if they are answered elsewhere as I haven't been able to find anything on my own.

Is El Dorado enforcing any covid measures?

If so, how are we enforcing these measures?

Is El Dorado selectively enforcing covid some measures?

If so, which measures are we enforcing and which ones are we not enforcing?

If so, how is the decision made on which ones to enforce and which ones not to enforce?

Thanks,
Nicholas Hendricks
