Please submit this email as a public comment for the next covid update provided to the Board of Supervisors.

Where is this in the Constitution????

"Sometimes we may actually have to infringe on some people's rights in order to protect the majority of other people's rights."

Nancy Williams

El Dorado County Public Health Officer (video attached)

As to Nancy Williams comments, um... NO. Government doesn't grant rights nor can they take them away. Our rights are granted to us by God and it's government's responsibility is to secure those rights.

AB 262 has given Public Health Officers broad powers that are clearly unconstitutional. As our local officials, y'all swore an oath to uphold and defend the constitution of the United States and the State of California. It is your responsibility to intercede for the citizens when officials at the state and/or federal level adopt ordinances or policies that directly violate your sworn oath.

By allowing Nancy Williams to continue obfuscating on requested data, such as PCR testing thresholds in El Dorado County, and issuing edicts to business that have no basis in science and are violations of several articles in the constitution, you are failing in your responsibilities to the citizens of El Dorado County. She is acting as a tyrant and must be fired. The government isn't allowed to destroy businesses, place citizens effectively under house arrest, quarantine the healthy and interfere with the basic human right of breathing free air. These things have been done by fiat of the county health officer, evidently with y'all's blessing. This charade has gone on long enough. Fire this incompetent tyrant and end all restrictions illegally placed on citizens during this government created crisis.

Are you following what's going on in Shasta County regarding the citizens being sick and tired of all this nonsense? If not, you probably should. Government by the consent of the governed is what our constitutional republic is based on and it's way past time to get back to that basic principle.

Thank you for your time.

Clerk please submit this email as Public Comment on the next Covid Update provided to the Board of Supervisors.

Supervisors,

Per Nancy Williams' document on Efficacy (see below) Overall Efficacy is based on preventing Symptomatic Disease...It does not say Immunity or that it would prevent disease. So if you were infected, wouldn't that make you an Asymptomatic Carrier?

Yet Nancy Williams continues to infer that efficacy means immunity and has said "the virus can only mutate while in someone's body and that is why we must persuade people with hesitancy to be vaccinated."

These are dangerous and misleading statements that could lead to the discrimination and persecution of people that do not want to take part in these experimental gene modification injection treatments.

It is also incredibly misleading for the people that are counting on her statements to do a risk/benefit analysis for themselves and their family when making a decision to get the vaccine.

Also people that have been vaccinated will be under the impression that they are not a risk to people they may come in contact with, possibly people that could be in a high risk category.

Nancy Williams needs to retract her previous statements publicly. It is unethical to make misleading statements and this is unacceptable especially as people's lives are truly at stake. I would think these statements are also a great liability for the county. Please take corrective action immediately.

To: Board of Supervisors
From: Nancy Williams, MD, MPH, *Nancy Williams*
Public Health Officer
Subject: COVID-19 vaccine efficacy and other vaccine information
Date: April 6, 2021

Dear Board,

As promised during the 3/23/2021 board meeting, I am providing the following written summary of vaccine information in response to interest expressed in this topic by community members. My assessment continues to be that the vaccines currently in use in the U.S. are extremely effective in the most important outcomes – reducing infection overall and reducing severe disease and death. Several reliable sources of information are shared below.

1. [February 2021 Journal of the American Medical Association \(JAMA\) article](#)
(Table also provided separately)

This article provides the following information about vaccine efficacy.

Vaccine	Overall efficacy after 1 dose	Overall efficacy after 2 doses	Efficacy against severe disease
Moderna	92.1%	94.1% (after 14 days)	100% (14 days after 2 nd dose)
Pfizer-BioNTech	52%	94.6% (after 7 days)	89% (after 1 dose)
Janssen/Johnson & Johnson	72% (after 28 days)	N/A	85% (after 28 days) 100% (after 49 days)

The overall efficacy was based on people developing symptomatic disease.

The differences in numbers of doses, numbers of days between doses, and number of days after the last dose that were used for measurement of effectiveness are due to decisions the individual manufacturers made when they developed their vaccine studies and results (such as at 49+ days following J&J vaccine administration) observed subsequently. Each could have been studied differently but these are the ways they chose.

The more time that passes, the more real-life data will accumulate and shed additional light on efficacy of these and additional vaccines that may come into play in the U.S. But for now, they appear very effective and even though they are not perfect in preventing infections, especially mild and asymptomatic cases, there is reason to believe that those cases are much less likely to

Clerk please add this email as Public Comment of the next Covid Update provided to the Board of Supervisors.

Supervisors and County Health Officials,

I am very disappointed to see the County advertising Covid Vaccines to the underage. Covid is not a risk to 16 year olds. Vaccines do pose a risk. Please take the time read the through the compilation of vaccine injuries reported to VAERS provided by the Frontline doctors (attached). Do you want children needlessly being harmed in our county on your conscience?

Keep in mind that vaccine makers have had zero liability for their harm caused since the Childhood Vaccine Injury Act of 1986. It is my understanding that vaccine makers cannot advertise the Covid Vaccines as they are not FDA Approved. It leads me to wonder what incentives the County stands to benefit from for doing their bidding.

I was also very disturbed that the County published the consent form for parents to sign stating that they had received the EAU Fact Sheet, though there was no link or access to that Fact Sheet. The County should not be encouraging anyone to give their signature to acknowledge they have read or received a document for which they were never given access to. Please take corrective action to ensure this document is given to anyone considering taking these experimental injections.

Clerk, please submit this email as Public Comment for 4/27.

To all concerned:

The false positives/over sensitive pcr tests is a matter of urgency that needs to be addressed immediately. These tests impact many people's lives and are not reliable. They are the tool used to keep control. Fauci stated in July 2020 that tests done with cycles above 34 should not be considered positives. Yet the state lab that school district athletes in our county must use (covid cash 💰) is not following this nor have they course corrected after the WHO statement in 2020.

I brought up the rampant false positives in the NFL to you at several meetings during football season. I told you about Governor Desantis requiring labs to submit ct threshold with results.

You know who else hasn't course corrected? You.

It's time for a moratorium on testing of asymptomatic people in our county and it's time to rescind the county emergency declarations.

Keeley Link and I brought attention to the pcr ct cycles many times. Why have you not looked into this? Are you just listening to Nancy spin her opinion of thresholds which does not coincide with WHO or Fauci. The tests are not meant to be used as a stand alone diagnosis. If cycles above 34 are used it's like finding a hair in the room after someone has left the building. No or very little viral load. Nothing to transit!

RESULT	VALUE	UNITS	REFERENCE RANGES	ABNORMAL
	Detected		Not detected	Abnormal
94500-6 - SARS-CoV-2 (COVID-19) RNA NAA+probe Qi (Resp)	260373001 - Detected		Not detected	Abnormal

PerkinElmer New Coronavirus Nucleic Acid Detection Kit_PerkinElmer, Inc._EUA
Performing Organization: CDPH Branch Laboratory
Performing Organization Address: 28454 Livingston Ave., Valencia, CA, 91355

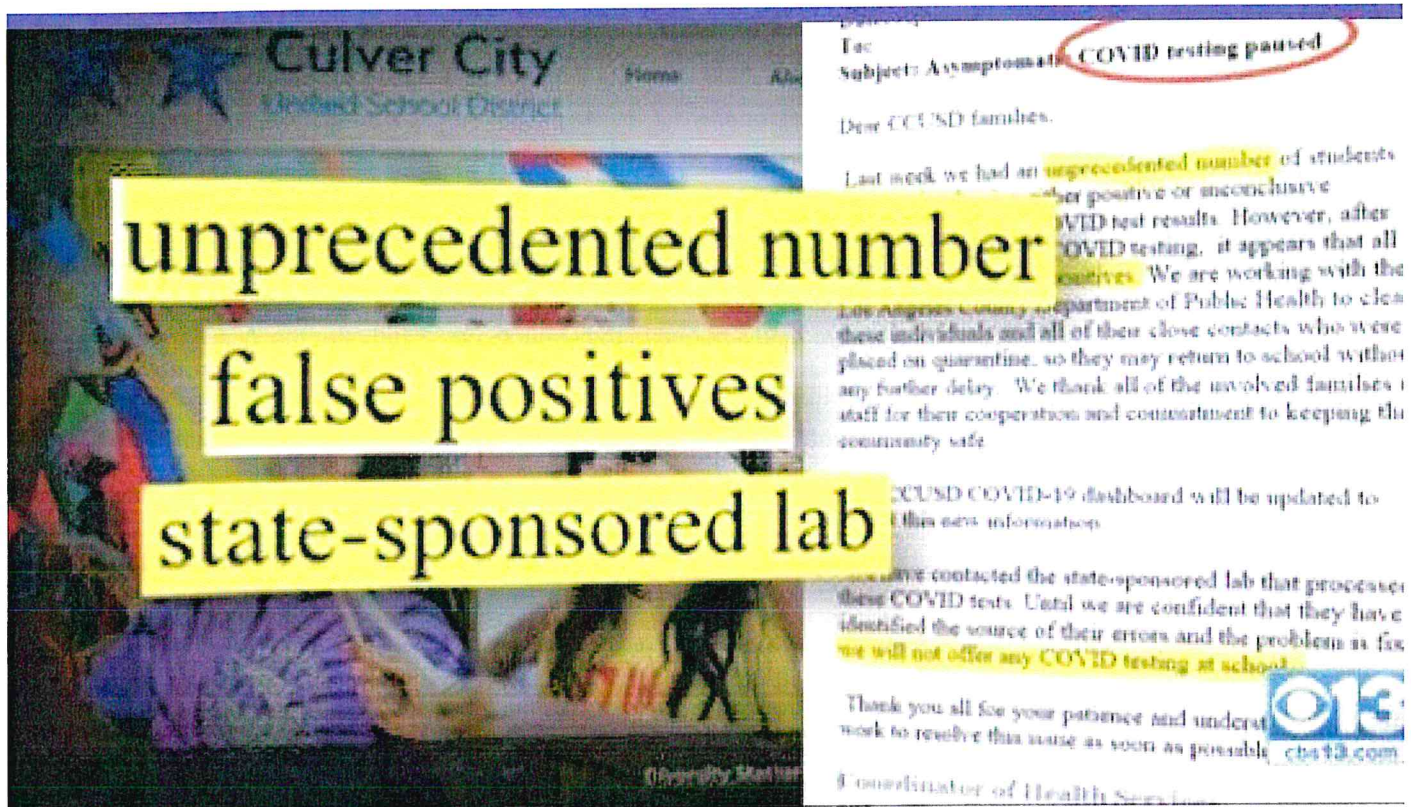

I agree with Keeley's letter below.

Supervisors and Health Officials,

There has been a disturbing amount of False Positives coming out of the State Lab. Please see the CBS 13 news story below. Culver City School District has seen an increase in positivity by over 1000% and our very own El Dorado Union High School District students were negatively impacted with over 200 students being quarantined and athletes losing their entire sports season.

I have written to you all several times regarding PCR tests and the issue of Cycle Thresholds being a cause of the oversensitivity. Florida recognized these issues and took action last year. See the directive put out by Florida Public Health (below) requiring all labs to report Cycle Thresholds along with test results. Why has El Dorado County not taken the same action? What is your solution? At the very least, Nancy Williams could suggest we stop testing people that have no symptoms.

These problems are plaguing our youth and our community. We need you all to find solutions and take the corrective actions immediately, so that our children are not harmed unnecessarily any more than they already have been by Covid response measures. I look forward to the upcoming Covid Update to hear these matters discussed further.

Mandatory Reporting of COVID-19 Laboratory Test Results: Reporting of Cycle Threshold Values

December 3, 2020

Laboratories are subject to mandatory reporting to the Florida Department of Health (FDOH) under section 381.0031, Florida Statutes, and Florida Administrative Code, Chapter 64D-3.

- All positive, negative and indeterminate COVID-19 laboratory results must be reported to FDOH via electronic laboratory reporting or by fax immediately. This includes all COVID-19 test types—polymerase chain reaction (PCR), other RNA, antigen and antibody results. For a list of county health departments and their reporting contact information, please visit www.FLhealth.gov/chdepcontact.
- Cycle threshold (CT) values and their reference ranges, as applicable, must be reported by laboratories to FDOH via electronic laboratory reporting or by fax immediately.

As per Florida Administrative Code, rule 64D-3.031, laboratories must report all of the following:

- The patient's:
 - First and last name, including middle initial
 - Address (including street, city, state and ZIP code)
 - Telephone number (including area code)
 - Date of birth
 - Sex
 - Race
 - Ethnicity (Hispanic or non-Hispanic)
 - Pregnancy status, if applicable
 - Social Security number
- The laboratory:
 - Name, address and telephone number of laboratory performing test
 - Type of specimen (e.g., stool, urine, blood, mucus, etc.)
 - Date of specimen collection
 - Specimen collection site (e.g., cervix, eye) if applicable
 - Date of report
 - Type of test performed and results, including reference range, titer when quantitative procedures are performed and all available results on speciation, grouping or typing of organisms
- The submitting provider's:
 - Name
 - Address (including street, city, state and ZIP code)
 - Telephone number (including area code)
 - National provider number (NPI)

If your laboratory is not currently reporting CT values and their reference ranges, the lab should begin reporting this information to FDOH within seven days of the date of this memorandum. If your laboratory is unable to report CT values and their reference ranges, please fill out the [brief questionnaire attached](#) to this memorandum and submit by facsimile to the FDOH's Bureau of Epidemiology confidential fax line at 850-414-6894, within seven days of the date of this memorandum
