Subject: Housing
To: <economic.development@edcgov.us>

As a small business owner and employer in El Dorado County it is becoming increasingly difficult to hire staff at any wage that I can afford as a small business.

Anecdotally I have heard from my staff/other employers that people are having a really hard time finding a place to live that they can afford. And lots of people are moving away to areas where they can afford to live.

We need to build more housing for a workforce that makes wages that small businesses can afford to pay.

I support CEDAC doing whatever it can to support the development of workforce housing in EDC, including publicly supporting individual projects. We need to make building housing less difficult in this County.

Cheers!
