Environmental Management Department presenting an update to the Board on the radon-screening study recently conducted by the California Department of Public Health and the California Geological Survey in the Tahoe basin area of El Dorado County.

Fiscal Impact/Change to Net County Cost: None

Background: The California Department of Public Health in cooperation with the California Geological Survey conducted a voluntary radon-screening project to measure the indoor radon levels in selected zip code areas in the Tahoe basin area of El Dorado County. Preliminary results of this screening indicate that a percent of the homes tested had elevated radon levels of 4 picocuries per liter (pCi/L) or higher, the EPA recommended action level. The Environmental Management Department supports a radon education and public outreach program in cooperation with the California Department of Public Health. In addition, the Department will work with the Development Services Department to provide permit recipients with radon mitigation information.

Reason for Recommendation: NA

Action to be taken following Board approval: NA

Contact: Gerri Silva, MS, REHS, Director of Environmental Management
