Background: The Department of Agriculture, Weights & Measures under this agreement is reimbursed by CDFA for implementing an intergovernmental, coordinated state and community -wide plan to provide detection and delimitation of the glassy-winged sharpshooter (GWSS) in El Dorado

County and suppress or eradicate any population as rapidly as possible. The GWSS is a very serious pest that transmits Pierce's Disease to grape vines. Pierce's disease has the potential to completely destroy El Dorado County's multimillion dollar wine grape industry.

Under the terms of this agreement, El Dorado County Agricultural Department will act as the lead agency for the Pierce Disease Control Program (PDCP) and CDFA will work in cooperation with the State PDCP Science Advisory Panel, officials in affected counties, and other interested parties in implementing this work plan. The CDFA will provide biological control program guidance and support to the county to implement this work plan.

Reason for Delay: Department did not receive the Agreement from CDFA until August 22, 2007. The State has turned this annual contract into a three year contract to expedite processing in each of the following years.

Fiscal Impact/Change to Net County Cost: The funding for this program is included in the adopted FY 2007-08 budget and will be included in the FY 2008-09 and FY 2009-10 budgets. This contract will not change the Department's Net County Cost.

Action to be taken following Board approval:

- 1) Board Chairman signs 1st and additional single page of CDFA Agreement #07-0144.
- 2) Board Chairman signs State of California CCC-307 Certification.
- 3) Once a fully-executed original Agreement #07-0144 is received from CDFA, Department will forward it to the Board Clerk for your files.
