File #: 22-1687, **Version:** 1

Chief Administrative Office recommending the Board order the Auditor-Controller to disburse \$119,836.13 from the El Dorado County Fire Protection District ("District") Impact Mitigation Fee account to the District for the increased cost for a ladder truck to be placed at Station 28 in Shingle Springs.

FUNDING: Development Impact Mitigation Fees.

DISCUSSION / BACKGROUND

The California Mitigation Fee Act (Cal. Gov. §66000 et seq.) provides for the establishment of fees to mitigate the impacts of new development on public facilities in order to maintain the established level of service. Individual Special Districts do not have the authority to establish these fees; as a result, the County establishes fees on behalf of the districts. In accordance with the Mitigation Fee Act, these revenues are segregated and deposited into a separate account for each district.

Development impact mitigation fees were first collected on the District's behalf in 1985. The District's fee was last updated in 2021 (File No. 21-0958). In accordance with the Mitigation Fee Act, these revenues are segregated and deposited into a separate account for each district. As outlined in the District's 2021 nexus study, revenue from fees collected on new residential and commercial development may be used to pay for the development of new equipment and facilities that expand service capacity resulting from growth caused by new development.

As a result of new development that has occurred within the District, the District is requesting disbursement of funds in the amount of \$600,000 for the purchase of a new 105-foot ladder truck to be placed at Station 28, 3860 Ponderosa Road, Shingle Springs, CA 95682. The District estimated that this amount represented approximately 50% of the \$1,200,000 total amount needed to purchase the equipment. On July 19, 2022, the Board of Supervisors approved the request of \$600,000 from development impact mitigation fees (Legistar Item #22-1249).

The District received a quote for the purchase. Given the current inflation and supply chain delays, the cost for the apparatus is \$1,319,836.13. With the updated quote provided by the manufacturer the District is requesting an additional \$119,836.13 for the purchase. The ladder truck will mitigate impacts of new development to serve the ongoing commercial development within the business park in Shingle Springs, south of Highway 50, and the significant development underway at the Red Hawk Casino. Currently, the response for a ladder truck to this area would be from the Placerville station, or mutual aid from Diamond Springs or El Dorado Hills. The equipment adds service capabilities to the District, which are needed in order to accommodate the demand created by new development. The District's request is attached (Attachment A).

The County and District have entered into an agreement dated December 19, 2017, whereby the District agrees to "hold County harmless and defend County and its employees, officers, and agents from any claim, liability, or action" resulting from the County's calculation, imposition, and collection of

impact fees on the District's behalf (File No. 17-1290).

The Chief Administrative Office recommends the disbursement of funds for the above-described use because it is consistent with the purpose for which the fee was collected, the District and County are currently in compliance with the Mitigation Fee Act, and the indemnity agreement between the District and the County sufficiently protects the County from potential liability related to the disbursement.

El Dorado County Fire Protection District

FINANCIAL IMPACT

There is no impact to the County's budget. Impact mitigation fees are collected by the County on behalf of the District and held in a separate account. The revenues may only be used by the District for purposes that comply with the Mitigation Fee Act.
