DISCUSSION / BACKGROUND

The PG&E Public Safety Power Shutoff events (PSPS) have emphasized the need for the County to install generators at many of its locations. Several critical locations have been addressed but County owned locations on Spring Street lack adequate emergency back-up power.

A mobile generator is needed to serve both the Psychiatric Health Facility (PHF) located at 935A Spring Street and Senior Center located at 937 Spring Street in Placerville. Placing a generator that can serve both locations will allow essential services to remain unaffected by any power outages.

Normally generators are a permanent fixture to the building and add value which is why they are typically categorized as a fixed asset/building improvement. However, because this generator is mobile, the generator will actually be a "fixed asset/piece of equipment" and therefore must be approved by the Board as a specific fixed asset for purchase in FY 2021-22.

ALTERNATIVES

If the Board does not approve the agenda item, the Facilities Division will not be able to purchase the generator and the PHF and Senior Center will be adversely impacted by any power outages.
