Health and Human Services Agency recommending the Board authorize the Purchasing Agent to execute a Purchase Agreement, contingent upon approval by County Counsel and Risk Management, for converting the 2023 Ford Transit ELT-350 HD XL AWD for the County of El Dorado Public Health Division into a mobile laboratory and nursing services vehicle in an amount of \$168,427.55 due to costs of the conversion services that were not included in the prior Board-approved amount.

**FUNDING:** 100% Enhancing Laboratory Capacity (ELC) Enhancing Detection Expansion Funding. (COVID-19ELC68)

### DISCUSSION / BACKGROUND:

Over the past several years, the County of El Dorado's HHSA Public Health Division's ability to reach our more vulnerable populations living in remote areas of our county has been severely hampered, particularly during inclement weather. The acquisition of a 4WD specialty van is essential to enhance our ability to reach vulnerable clients to provide Public Health medically related services to include, but not limited to communicable disease testing, vaccinations, other needed nursing services, and Public Health education. On March 16, 2021 (File ID: 21-0366), the Board approved the purchase of a mobile laboratory and nursing services vehicle using ELC Enhancing Detection Expansion Funding. Since the authorization of the spending plan, staff have been trying to find an appropriate vehicle, but were unable to until February 2023, due to supply chain issues.

On February 22, 2023, the County submitted a Purchase Order to TriVan for the purchase of a 2023 Ford Transit EL T-350 HD XL AWD van (PO# 23000785) in the amount of \$72,433.88. The conversion of this vehicle is necessary to use it in the capacity of a mobile laboratory and nursing services vehicle. This conversion is only available from one vendor, TriVan Truck Body. TriVan Truck

Body is able to custom build this vehicle within a reasonable timeframe and to fit our unique needs as a flexible mobile laboratory with testing and treatment supplies and essential vaccines that would be an important tool in the fight against communicable diseases and other emerging infections in El Dorado County.

On March 21, 2023 (File ID: 23-0454), the Board of Supervisors approved the sole source purchase with TriVan Truck Body authorizing the Purchasing Agent to execute a Purchase Agreement for the customization of the County of El Dorado HHSA Public Health Division's 2023 Ford Transit ELT-HD XL AWD into a mobile laboratory and nursing services in the amount of \$162,442. Following approval, the Public Health Division discovered sales tax of 7.25% was not included in the initial quote for customization. A revised quote was then provided by TriVan Truck Body. As a result, this item is being presented to the Board again to seek approval for a revised cost of \$168,427.55, an increase of \$5,985.55.

This mobile laboratory will provide outreach services within multiple remote communities, reducing transportation and other barriers to care. Ultimately, providing Public Health education and reducing the instances of communicable diseases in the County. The ability to conduct on-site laboratory testing for communicable diseases and then provide on-the-spot treatment will be instrumental in reducing community spread. Also, by providing immediate treatment, patients will be more likely to have a less severe infection and an earlier recovery. Lastly, by providing community-based vaccinations, Public Health will be able to reach our goal to improve immunization rates, which continue to lag behind state rates. Through collaboration with community partners, we will also further improve our reach to high-risk and vulnerable populations, improving the health of our most vulnerable.

#### **ALTERNATIVES:**

Should the Board decline to authorize this purchase, Public Health will be left without a mobile laboratory. Without this vehicle, we will be unable to provide important community-based communicable disease testing, treatment, immunizations, and other nursing services, resulting in high-risk and vulnerable populations going without services and the County immunization rates lagging further behind the State.

#### **PRIOR BOARD ACTION:**

- 1) 23-0454, 3/21/23 HHSA - TriVan Purchase
- 2) 21-0366, 3/16/21 CAO and HHSA CARES ACT

#### **OTHER DEPARTMENT / AGENCY INVOLVEMENT:**

Approved by Procurement and Contracts.

#### **CAO RECOMMENDATION:**

Approve as recommended.

#### **FINANCIAL IMPACT:**

There is no General Fund cost associated with this agenda item. The Fiscal Year 2022-23 Budget for Public Health has already set aside \$250,000 for the purchase of a Mobile Public Health Van Fixed Asset. The vehicle acquisition itself cost \$72,433.88, and the proposed customization will be covered within the Enhancing Laboratory Capacity (ELC) Enhancing Detection Expansion Funding budget allocation without exceeding it.
