Outflow Methodology

Questions on how outflow tons are determined and jurisdiction of origin is tracked.

Method(s) Used To Determine Tons Sent . Title 14, Ccr, 18815.9(g)

- Track outflow amounts based on my own measurements of the following (Check all that apply): (multi-select)
 - Track material weight using certified scales. 18815.9(g)(1)
- Rely on the receiving facility to provide outflow amounts based on the recipient's measurement of tons using the following methods (Check all that apply): (multi-select)
 - Track material weight using certified scales. 18815.9(g)(1)

Method(s) Used To Determine Jurisdiction Of Origin For Direct Haul Material (msw), Green Material Potential Beneficial Reuse From Direct Haul, Or Mixed Plastic Waste Export. Title 14, Ccr, 18815.9(b)

- Standard methods for each load of material accepted (check all that apply). (multi-select)
 - Ask jurisdiction of origin at the gate at the time of delivery for each hauler/person bringing materials. 18815.9(b)(2)

Review Flags

Review and Submit Status (Flags generated and reviewed)

Severity	Status	Source	Type	Description
Correction Required	Closed	Disposal Origins	Total Direct Haul Tons accepted in the origins tab does not equal the total direct hauled disposal inflow tons	The total solid waste for disposal tons accepted entered in the Direct Hauled Origins tab does not match the Total Direct Hauled solid waste for disposal tons reported in Inflows. Please correct this so that the tons accepted matches the tons reported in Inflows.
Correction Required	Closed	Disposal Origins	Disposal tons sent to a facility do not match between the Disposal Origins and Disposal Allocations tabs.	Within the Disposal Origins tab, the tons sent to each destination facility within one or more jurisdictions were modified so that the total tons sent to Potrero Hills Landfill, Inc (RD10775) according to the Disposal Origins tab did not match the total tons sent to that facility – that were from direct haul – according to the Disposal Allocations tab. To correct this error, go to the Disposal Origins tab, Click Review, click Destination Details, and then modify the jurisdiction tons sent values for each jurisdiction and destination facility such that the total tonnage sent to each facility matches the direct haul value reported for each destination facility on the Disposal Allocations tab.
Correction Required	Closed	Disposal Origins	Disposal tons sent to a facility do not match between the Disposal Origins and Disposal Allocations tabs.	Within the Disposal Origins tab, the tons sent to each destination facility within one or more jurisdictions were modified so that the total tons sent to Forward Landfill (RD11122) according to the Disposal Origins tab did not match the total tons sent to that facility – that were from direct haul – according to the Disposal Allocations tab. To correct this error, go to the Disposal Origins tab, Click Review, click Destination Details, and then modify the jurisdiction tons sent values for each jurisdiction and destination facility such that the total tonnage sent to each facility matches the direct haul value reported for each destination facility on the Disposal Allocations tab.
Correction Required	Closed	Disposal Origins	The total destination tons for a jurisdiction does not match the actual destination tons for that jurisdiction determined in the origins review screen.	The total destination tons sent for El Dorado-Unincorporated does not match estimated total tons sent for El Dorado-Unincorporated. Please correct the destination records for El Dorado-Unincorporated so that the Total tons sent equals the estimated tons sent by El Dorado-Unincorporated.
Correction Required	Closed	Disposal Origins	The total destination tons for a jurisdiction does not match the actual destination tons for that jurisdiction	The total destination tons sent for Placerville does not match estimated total tons sent for Placerville. Please correct the destination records for Placerville so that the Total tons sent equals the estimated tons sent by Placerville.

			determined in the origins review screen.	
Correction Required	Closed	Disposal Origins	Total Actual tons sent does not equal total tons sent in the Outflow by destination for direct haul table.	The total actual tons sent for direct hauled origin solid waste in the Direct Hauled Origin and Material sent table does not equal the Estimated total tons sent from direct haul. The actual tons must match the estimated tons of direct haul sent since the estimated value is the portion of direct haul material sent out to the destinations reported in Outflows. Please correct the actual tons sent by jurisdictions so that the Total actual tons match the estimated total tons sent from direct haul.
Correction Required	Closed	Disposal Origins	The default disposal tons sent to destinations were changed within the "Review Origins Sent" feature of the Disposal Origins tab, but questions asking why tons were changed were not answered.	On the Disposal Origins tab, within the "Review Origins Sent" feature, you changed one or more of the actual tons sent to a destination from the estimated tons sent based on inflows. But, you did not answer the questions asking why you changed the default values. To close this flag, on the Disposal Origins tab, select Edit at the top of the page to answer the questions on why you changed the default tons sent values.
Correction Required	Closed	Disposal Origins	One or more records in the Direct Hauled Origins Destination and Material sent table have not been accepted and/or modified.	One or more jurisdiction records in the Direct Hauled Origins Destination and Material sent table have not been accepted and/or modified. Please review the accepted/modified column and accept or modify any jurisdiction material sent records that do not have an accepted or modified status.
